Producing Table Olives

Landlinks Press Australia has the ideal conditions for growing and processing table olives. In a climate where the majority of table olives eaten by Australians are imported, real opportunities exist for a domestic table olive industry. Attention to quality and safety will ensure that Australian table olive producers are in a position to tackle and make inroads into the international export market. The aim of this manual is to provide olive growers and processors with internationally based guidelines for ensuring the quality and safety of processed table olives. This manual covers all aspects essential for the production of safe, nutritious and marketable table olives including site selection, recommended varieties, pest and disease control, primary and secondary processing, and quality and safety testing.

Advances in Green Synthesis

Avenues and Sustainability

Springer Nature This edited book focusses on green chemistry as the research community endeavours to create eco-friendly materials and technologies. It provides an in-depth overview of the fundamentals, key concepts and experimental techniques for eco-friendly synthesis of organic compounds and metal/metal oxide nanoparticles/nanomaterials. It also emphasizes the mechanisms, designing and industrial technologies for green synthesis and its applications. Each chapter brings the recent developments, state of the art, challenges and perspectives which cover all the aspects in one place, and which concern the green synthesis and evolution. Authored by world-renowned experts in a broad range of green chemistry sectors, this book is an archival reference guide for researchers, engineers, scientists and postgraduates working in the field of sustainable science, green chemistry, environmental science, engineering sciences and industrial technologies.

Internal Combustion Engines

Performance, Fuel Economy and

Emissions

Woodhead Publishing This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO₂ emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Advancement in Sensing Technology

New Developments and Practical Applications

Springer Science & Business Media The book presents the recent advancements in the area of sensors and sensing technology, specifically in environmental monitoring, structural health monitoring, dielectric, magnetic, electrochemical, ultrasonic, microfluidic, flow, surface acoustic wave, gas, cloud computing and bio-medical. This book will be useful to a variety of readers, namely, Master and PhD degree students, researchers, practitioners, working on sensors and sensing technology. The book will provide an opportunity of a dedicated and a deep approach in order to improve their knowledge in this specific field.

The Last Confession

Dramatists Play Service, Inc. In 1978, a little-known country priest is inaugurated as Pope John Paul I. Promising liberal reforms and progress for the Church, the new Pope warns three power-drunk cardinals that they will be removed from the Vatican. Thirty-three days after his election, he is found dead, and no autopsy is performed. But that's only the beginning of the story...A gripping mystery, inspired by the true-life event of Pope John Paul I's death and the conspiracies surrounding it, pitting power against faith in a battle for the ultimate truth.

Introduction to Radar Using Python and MATLAB

Artech House This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

Phytobiont and Ecosystem Restitution

Springer This book offers present-day retrospectives and future perspectives on 'phytobiont' studies in the context of phyto-micro restitution, filling some of the information gaps in this promising research field. It discusses several ecosystem restitution strategies using dissimilar groups of microbes alone or in association with plants, as well as advances in metagenomics technology for studying in situ micro and macro communities in contaminated soil. It addresses topics such as the status quo, and the perspectives of microbial researchers and scientists, foresters, students, environmentalists, agriculturists and professional engineers. The rising pollution levels caused by xenobiotics is one of the biggest problems of our times, and as such the book comprehensively elaborates the latest research in this field and describes how the issue can be tackled using micro-organisms. With detailed diagrams and illustrations, the book is a valuable resource for experts and novices in the field of microbial bioremediation, phyto-bioremediation and environmental microbiology

Craniosacral Therapy for Children Treatments for Expecting Mothers, Babies, and Children

North Atlantic Books **Craniosacral Therapy for Children** introduces a **craniosacral therapy treatment protocol for babies and children up to 12 years of age. A gentle hands-on healing approach, craniosacral therapy releases tensions in the body in order to relieve pain, resolve trauma, and improve physical and emotional health. Author and craniosacral therapist Daniel Agustoni discusses the reasons for treating young children and for beginning treatment during pregnancy. He explains how the stress of birth can cause asymmetries and misalignments in babies' bodies that can lead to problems later in life: from suckling problems, abdominal colic, and fragmented sleep patterns to anxiety, hyperactivity, and ADD. Agustoni demonstrates how craniosacral therapy can also offset the effects of stress, trauma, and PTSD that may affect the growing child depending on his or her environment, biology, and temperament. Enhanced with over 120 instructional photos and illustrations, the book's hands-on techniques are presented along with suggestions for interacting with parents, babies, and young children. The book discusses methods of evaluation and treatment following structural, functional, and biodynamic models. Engaging case examples describe the therapeutic results of the treatment, which include increased security and confidence, relaxation, support for the immune system, and a sense of well-being. An important resource for healthcare practitioners, this book is also useful for educators, parents, and caregivers interested in learning new ways to help their children. From the Trade Paperback edition.**
