100 BIRDS AND HOW THEY GOT THEIR NAMES

Algonquin Books *How did cranes come to symbolize matrimonial happiness? Why were magpies the only creatures that would not go inside Noah's Ark? Birds and bird imagery are integral parts of our language and culture. With her remarkable ability to dig up curious and captivating facts, Diana Wells hatches a treat for active birders and armchair enthusiasts alike. Meet the intrepid adventurers and naturalists who risked their lives to describe and name new birds. Learn the mythical stories of the gods and goddess associated with bird names. Explore the avian emblems used by our greatest writers--from Coleridge's albatross in "The Ancient Mariner" to Poe's raven. A sampling of the bird lore you'll find inside: Benjamin Franklin didn't want the bald eagle on our National Seal because of its "bad moral character," (it steals from other birds); he lobbied for the turkey instead. Chaffinches, whose Latin name means "unmarried," are called "bachelor birds" because they congregate in flocks of one gender. Since mockingbirds mimic speech, some Native American tribes fed mockingbird hearts to their children, believing it helped them learn language. A group of starlings is called a murmuration because they chatter so when they roost in the thousands. Organized alphabetically, each of these bird tales is accompanied by a two-color line drawing. Dip into 100 Birds and you'll never look at a sparrow, an ostrich, or a wren in quite the same way.*

TRANSLATION TRANSLATION

BRILL *Translation Translation contributes to current debate on the question of*

translation dealt with in an interdisciplinary perspective, with implications not only of a theoretical order but also of the didactic and the practical orders. In the context of globalization the question of translation is fundamental for education and responds to new community needs with reference to Europe and more extensively to the international world. In its most obvious sense translation concerns verbal texts and their relations among different languages. However, to remain within the sphere of verbal signs, languages consist of a plurality of different languages that also relate to each other through translation processes. Moreover, translation occurs between verbal languages and nonverbal languages and among nonverbal languages without necessarily involving verbal languages. Thus far the allusion is to translation processes within the sphere of anthroposemiosis. But translation occurs among signs and the signs implicated are those of the semiosic sphere in its totality, which are not exclusively signs of the linguistic-verbal order. Beyond anthroposemiosis, translation is a fact of life and invests the entire biosphere or biosemiosphere, as clearly evidenced by research in "biosemiotics", for where there is life there are signs, and where there are signs or semiosic processes there is translation, indeed semiosic processes are translation processes. According to this approach reflection on translation obviously cannot be restricted to the domain of linguistics but must necessarily involve semiotics, the general science or theory of signs. In this theoretical framework essays have been included not only from major translation experts, but also from researchers working in different areas, in addition to semiotics and linguistics, also philosophy, literary criticism, cultural studies, gender studies, biology, and the medical sciences. All scholars work on problems of translation in the light of their own special competencies and interests.

The author takes into account the discoveries of modern science about our world, our environment and our bodies, looking for and finding answers to all the unanswered questions in ancient Indian and Greek wisdom. „This book will not be kept on my bookshelf but will remain on my table and I'm going to read it for the rest of my life. I'm going to learn from it and will meditate on issues covered in it. The wisdom, Gupta relies on and carries in his heart and soul is not a religion, nor a philosophy, nor a belief, nor a science; but is a metaphysical knowledge. It is the only and absolute ancient knowledge, which deals with questions that govern the world and human existence." Péter Müller „Gupta is a true man of the world. He has wide knowledge of modern scientific and intellectual developments. But he is also acquainted with the wisdom of the past. He is well equipped to speak to an international audience of intellectuals, religionists, and political leaders about the nature of our modern problems and the way forward to practical solutions. The solutions Gupta presents are based on the best that modern science and ancient wisdom have to offer us. By offering new ways of understanding who we are and where we are, based on his deep acquaintance with source of traditional wisdom, both Eastern and Western, Gupta gives us hope of a better future.
