There has been some speculation that the use of natural gas in diesel engines in dual fuel configuration can dramatically reduce the particulate emissions, since only a fraction of the normal diesel amount is burned. This report evaluates that speculation by determining particulate emissions for a Caterpillar 3208 diesel engine operating on both diesel and dual fuel. All data reported are based on steady state particulate tests.* **Particle Filter Retrofit for All Diesel Engines [expert.verlag](#) **Boating MotorBoating Diesel & Gas Turbine Worldwide Catalog Power Farming in Australia and New Zealand Technical Manual Boating Diesel & Gas Turbine Progress MotorBoating Boating MotorBoating Boating MotorBoating****
