**MANUALS COMBINED: MILITARY WORKING DOG HANDLER MEDICAL AND DOCTRINE PRESENTATIONS AND MANUALS**

---

*Jeffrey Frank Jones* Over 3,200 total slides and pages ... **INTRODUCTION:** Dogs have served in active service at the sides of their handlers for decades. They have been heroes, showing bravery under fire, saving lives (often losing their own), and bringing comfort to the injured and infirmed. The first recorded American use of military dogs was during the Seminole War of 1835 and again in 1842. In Florida and Louisiana, the Army used Cuban bred bloodhounds for tracking. During the US Civil War, dogs were used as messengers, guards, and unit mascots. The Army Quartermaster Corps began the US Armed Forces' first war dog training during World War II. By 1945, they had trained almost 10,000 war dogs for the Army, Navy, Marine Corps, and Coast Guard. Fifteen war dog platoons served overseas in World War II. Seven platoons saw service in Europe and eight in the Pacific. MWDs were trained at Fort Carson, Colorado, organized into scout dog platoons, and used in the Korean conflict for sentry duty and support of combat patrols. In 1957, MWD training moved to Lackland Air Force base (LAFB), Texas, with the Air Force managing the program. Throughout the Vietnam Conflict, the Military Police Corps used dogs with considerable success. Most of these were sentry dogs used to safeguard critical installations such as ports and airfields. A new dimension in canine utilization was realized when marijuana detector dog teams were trained and deployed to assist military police in suppressing illicit drug traffic. Sentry and marijuana detector dog teams were then deployed worldwide in support of military police. An important outgrowth of the conflict was the development of canine research and development efforts. These ongoing efforts were able to initiate the first steps toward developing a more intelligent and stronger military dog, training dogs to detect specific drugs and explosives, developing multiple-purpose dogs, and employing tactical dogs by electronic remote control. In the 1990s and early 2000s, MWDs were deployed around the globe in military operations such as Just Cause, Desert Shield and Desert Storm, Uphold Democracy, and Enduring Freedom and Iraqi Freedom. These teams were effectively utilized to enhance the security of critical facilities and areas, as well as bolster force protection

and antiterrorism missions, allowing commanders to use military police **CONTENTS: Military Working Dog Handler Medical Presentations (1,248 slides) Military Working Dog Handler Additional Medical & Dental Presentations (346 slides) Handler Training Medical Tasks Manual (50 pages) Design Guide for Military Working Dog Facilities (31 pages) VETERINARY / FOODBORNE ILLNESS SPECIMEN SAMPLE TEST AND SUBMISSION GUIDE (72 pages) Military Police - Military Working Dogs (58 pages) SOLDIER'S MANUAL AND TRAINER'S GUIDE MOS 91T ANIMAL CARE SPECIALIST SKILL LEVELS 1/2/3/4 (407 pages) U.S. Army MILITARY WORKING DOG MANUAL (136 pages) U.S. Air Force MILITARY WORKING DOG PROGRAM (51 pages) U.S. Navy MILITARY WORKING DOG MANUAL (206 pages) United States Department of Agriculture National Canine Operations Manual (194 pages) United States Department of Agriculture National Detector Dog Manual (274 pages)**

## **GILBERT AND MAX**

---

### **THE BEGINNING**

---

*Page Publishing Inc* **Gilbert and Max** is a love story. It's a little different from your everyday love story. It's how two pets got a couple together. In a short period of time, lives were changed. Not just the two main characters, Jonathan Matthew Brown, known as John, and Patricia Ann Johnson, known as Patty. It would change the neighbors in the ordinary neighborhood and John's family back in Texas. As well as the person that is writing the book. The writer of the book is telling the story as it was told to her by Patty and John when she was living with them and beyond. She also uses some of their phrases in the writing of the book. Patty was a widow. Her husband had passed away before John moved into the neighborhood. Patty lived there most of her married life. John was a businessman that didn't have a nine-to-five job. He could come and go as he pleased. He would stay to himself. He wasn't who the neighbors thought he was. It was a spring storm that caused the story to come about. That's when Gilbert made Patty notice John. Gilbert was Patty's cat. John had been walking Max, John's dog, when the storm hit. It wasn't then when they got together. It was a few months later before anything really happened. Life would never be the same for anyone.

## KAYAK ADVENTURE IN SIBERIA

---

### THE FIRST SOLO CIRCUMNAVIGATION OF LAKE BAIKAL

---

*Dr. Detlev Henschel* This eBook is a narrative about a 1,250-mile long solo kayak adventure on the 1-mile deep Lake Baikal in East Siberia, Russia. The clash of different cultures (Russians, Evenks, Buryats) and the wonders of a not always safe unique and pristine nature with hungry bugging bears, extreme climate, 'Russian improvisation' pushed this experience to the limit for man and equipment. (The adventures can be seen on his YouTube Channel 1life4outdoor.) Not everyone dares to realize a life off the beaten track in an increasingly uncertain world and to actually fulfill ones dreams. Henschel is one who has been practicing this for tens of years without fear - 'well almost, to know what exists beyond the horizon before the Grim Reaper comes,' as he says himself. He is able to implement his minimalist plans into great and brilliant adventures. In this special case: 62 days alone in a kayak on the eastern Siberian Lake Baikal. This deepest lake in the world (1,642 m) is located north of Mongolia with a coastline of 2,000 kilometers and is not necessarily a safe area due to its inhabitants and wildlife. The clash of different cultures, the complications that come with it, such as constant encounters with hungry bears, the Russian mafia and the natives like Evenks and Buryats made it a real ordeal 24/7 for him. But the unique landscape, his discovery of the 'soul' of the Baikal, which is called 'Fountain of the Earth' by the natives together with the physical sensation of his surroundings 'while sliding around the lake with my butt on its surface' was the reward: Henschel tells of it - self-critical, honest, ironic and awesome to his environment. Once started, reading this book fascinates, it wakes you longing to realize your own dreams and see this fascinating part of the earth with your own eyes.

## VILLAGE PHONE REPLICATION MANUAL

---

### CREATING SUSTAINABLE ACCESS TO AFFORDABLE TELECOMMUNICATIONS FOR THE RURAL POOR

---

*United Nations Publications* Why is it such a challenge to provide telecommunications to rural areas? High initial infrastructure investment, relative low call volumes, high maintenance costs due to harsh environments, cash box collection needs, cash security costs (for coin operated phones), card availability (for prepaid airtime systems), technical illiteracy, remote locations, and high transportation costs are just some of the impediments to providing rural telecommunications access. This manual is based on the experiences of the

Village Phone Programmes in Bangladesh and Uganda. In rural villages where no telecommunications services have previously existed, the programme provides cellular phones via a sustainable financing mechanism to poor entrepreneurs who use the phone to operate a business. Such has been the success that over 2,000 village phone businesses are now operating in remote villages of Uganda. This manual is a guideline for replicating the programme in a new country. It establishes a template for creating sustainable initiatives that bring telecommunications to the poor, create viable new businesses for micro-entrepreneurs, and expand the customer base for telecommunications companies.

**MARTHA**

---

---

**USER'S MANUAL**

---

*Mit Press* MARTHA is a set of general-purpose programs for analyzing linear electrical networks, available to users with access to APL time-sharing systems. The programs analyze, as a function of frequency, most linear "transmission-type" networks, with an input and an output. This includes most filters, amplifiers, microwave networks, and feedback systems, even if such circuits are relatively complicated, with multiple feedback paths and branches. The programs cannot handle some complicated interconnections of components, and are not set up to analyze nonlinear or time varying networks. The topology of the network is described using "wiring operators." The elements available include lumped and distributed, active and passive, reciprocal and nonreciprocal elements. The possible output includes tow-port parameters (impedance, admittance, hybrid, scattering, and ABCD matrices), as well as voltage gain, insertion gain, transducer gain, etc. These, their real or imaginary parts, or magnitude or phase, may be printed or plotted as functions of frequency or of each other. More than one network can be analyzed simultaneously. MARTHA is not inherently better at one frequency range than another, except perhaps in its repertoire of elements and response functions. MARTHA includes, besides R, L, and C, sixteen controlled sources; operational amplifiers; mutual inductance; three transistor models and the possibility of easily creating others; ideal transformers; several composite pi and tee structures; and a few exotic elements such as gyrators. For high-frequency applications MARTHA has several microwave elements, including TEM transmission lines, waveguides, attenuators, and isolators.
