STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES

A PATH FORWARD

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

THE VALUE OF HUMANITY

Oxford University Press, USA L. Nandi Theunissen develops a non-Kantian account of the value of human beings. Against the Kantian tradition, in which humanity is absolutely valuable and unlike the value of anything else, Theunissen outlines a relational proposal according to which our value is continuous with the value of other valuable things. She takes the Socratic starting point that good is affecting, and more particularly, that good is a notion of benefit. If people are bearers of value, the proposal is that our value is no exception. Theunissen explores the possibility that our value is explained through reciprocal relations, or relations of interdependence, as when--as daughters, or teachers, or friends--we benefit others by being part or constitutive of relationships with them. She also investigates the possibility that we can be said to stand in a valuable relationship with ourselves. Ultimately, in The Value of Humanity, she proposes that people are of value because we are constituted in such a way that we can be good for ourselves in the sense that we are able to lead flourishing lives. Intuitively, a person matters because she matters to herself in a very particular sort of way; to appropriate a phrase, she is a being for whom her life can be an issue.

THE HYDROGEN ECONOMY

OPPORTUNITIES AND CHALLENGES

Cambridge University Press Responding to the sustained interest in and controversial discussion of the prospects of hydrogen, this book strives to reflect on the perspectives of a hydrogen economy in light of the global energy challenge, in particular the question of how to meet the growing demand for transport energy in the long term and how to secure sustainable energy for transportation. This book stands out from other publications by its emphasis on setting the scene for hydrogen, and the comprehensive coverage of all aspects related to the hydrogen subject. It aims to provide a reference and compendium about hydrogen that should be of interest to anyone who wants to catch up on the status of the hydrogen discussion, look up a specific aspect related to hydrogen, or understand how hydrogen comes off compared to other mobility solutions. The book should appeal to a fairly broad readership: academia, policy makers and industry.

CARIBBEAN LITERATURE IN TRANSITION, 1970-2020: VOLUME 3

Cambridge University Press The period from the 1970s to the present day has produced an extraordinarily rich and diverse body of Caribbean writing that has been widely acclaimed. Caribbean Literature in Transition, 1970-2020 traces the region's contemporary writings across the established genres of prose, poetry, fiction and drama into emerging areas of creative non-fiction, memoir and speculative fiction with a particular attention on challenging the narrow canon of Anglophone male writers. It maps shifts and continuities between late twentieth century and early twenty-first century Caribbean literature in terms of innovations in literary form and style, the changing role and place of the writer, and shifts in our understandings of what constitutes the political terrain of the literary and its sites of struggle. Whilst reaching across language divides and multiple diasporas, it shows how contemporary Caribbean Literature has focused its attentions on social complexity and ongoing marginalizations in its continued preoccupations with identity, belonging and freedoms.

YOGA IN THE MUSIC STUDIO

Oxford University Press, USA ""The ancient practice of yoga, which has exploded in popularity in the United States over the past two decades, has the potential to help music students learn to practice more mindfully and reach peak performance more quickly. This book explores how professional musicians and music teachers of all instruments and levels can use yoga postures (asana) and breath work (pranayama) to enhance artistry. Chapter Four describes the developmental benefits of yoga and music education in early childhood and includes a sample eight-week preschool music curriculum. Chapter Five on the adolescent student explains how yoga can alleviate stress related to social and performance anxiety, enhance mindfulness, and increase peer support in a music studio. Chapter Six, for professional musicians and college students, describes how yoga can prevent or alleviate repetitive stress injuries and other physical symptoms. The final chapter offers ideas for appropriate modifications for the retired adult along with a sample eight-week curriculum to combine yoga with Recreational Music Making. EGYPT

THE MOMENT OF CHANGE

Zed Books Ltd. Egypt is at the axis of the Arab world. With the largest population, the largest industrial economy and the longest tradition of modern political activity it has profound influence across the region. But there have been few attempts to understand contemporary Egyptian society, in particular growing internal pressures for change and their implications for the Middle East and the wider world. This book is the first for over 20 years to offer and accessible examination of contemporary issues in Egypt. It offers the reader analyses of its politics, culture and society, including contributions by several Egyptian academics and activists. This unique new book addresses the turmoil created by imposition of neo-liberal economic policies, the increasingly fragile nature of an authoritarian regime, the influence of movements for democratic opening and popular participation, and the impacts of Islamism. The authors argue that Egypt has entered a period of instability during which the 'low-intensity democracy' embraced by the Mubarak regime faces multiple challenges, including demands for radical change. This unique new book assesses the ability of the state to resist the new movements and the latter's capacity to fulfill their aims.

CONSTITUTIONAL CHANGE AND DEMOCRACY IN INDONESIA

Cambridge University Press How did democracy become entrenched in the world's largest Muslim-majority country? After the fall of its authoritarian regime in 1998, Indonesia pursued an unusual course of democratization. It was insider-dominated and gradualist and it involved free elections before a lengthy process of constitutional reform. At the end of the process, Indonesia's amended constitution was essentially a new and thoroughly democratic document. By proceeding as they did, the Indonesians averted the conflict that would have arisen between adherents of the old constitution and proponents of radical, immediate reform. Donald L. Horowitz documents the decisions that gave rise to this distinctive constitutional process. He then traces the effects of the new institutions on Indonesian politics and discusses their shortcomings and their achievements in steering Indonesia away from the dangers of polarization and violence. He also examines the Indonesian story in the context of comparative experience with constitutional design and intergroup conflict.
