Loosened Threads 2018 / poems by members of Poetry ID, the North Herts Stanza of The Poetry Society Greater Cincinnati Religious Peacemakers Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them. Reluctant Mistress, Blackmailed Wife Harlequin Single mother of twin boys, Katie didn't want their father, Greek billionaire Alexandros Christakis, back in her life. But poverty pushed her to ask for his help. Alexandros demanded that Katie marry him. They had nothing in common—except their mutual burning sexual attraction, but resistance was futile: both the twins and Katie needed Alexandros. She would submit to becoming his mistress... Strange Country Pan Australia "This book is about the people I met as I crisscrossed Australia by train and plane and L-plated car: the undefeated dreamers and wild-hearted romantics, the obsessed hobbyists and beautiful failures. It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up." As anyone who's ever read Mark Dapin's column and features in Good Weekend knows, he's an immensely funny, acute and vivid observer of Australian life. In Strange Country, he takes us on a journey through a very different Australia - a country that's eccentric, puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other. Moorish Circle 7 The Rise of the Islamic Faith Among Blacks in America and It's Masonic Origins Author House This book is based on the theory that the black Muslim movement was created from the knowledge of the Masonic order. In the early decades of the 20th century, noble drew ali established a political and religious organization known today as the Moorish Science Temple of America. It was this organization that exposed black to something other than the normal Christian influences of that day. Ali a high degree freemason, incorporated various Masonic teachings from an auxiliary group. Known as the AEAONMS ancient Egyptian Arabic order of noble of the mystic shrine A pseudo Islamic/Arabic oriental organization that served as a wake up call to a lost knowledge. A knowledge that was taken away from Africans during the slave trades. The theory behind this book is that the majority of the slaves that were taken from the west coast of Africa were practicing Muslims, and these Muslims were forced to convert to Christianity under the strong oppression of slavery. At one time Afro-Americans were the biggest minority in the American society. About 90% of the today's population of blacks are descendants of slaves that were brought to America for working on plantations since the 16th century. At the beginning of the 19th century most of the so-called Negroes lived in the plantation areas of the Southern States. After the Civil War and the abolition of slavery it wasn't until the early 1920s and 30s that blacks were beginning to experiment with other faiths. Of all the faiths Islam became the fastest growing religion and the most popular. This book by far is in no way a research into black history, instead it covers a more deeper aspect of history in which I call the history behind the history. It explores the true Asiatic origins of the ancient religions of Hinduism, Buddhism well as the Islamic faith. Finally it explores the Masonic symbolisms of alis Moorish science dogma digging deeper into the esoteric side of his Aquarian/Masonic teaching explaining their origins and discovering an age old wisdom that had been kept hidden from the human eye. One would think that Africans in the Americas would have rejected the religious tradition of their European oppressors taking into consideration that African religions are far older & they possess more sources of knowledge & spiritual salvation. Yet there are those who have turned away from traditional Christian dominated environments in order to find a greater understanding of themselves and the world in which they live. One alternative has been to seek knowledge in the various religious groups that arose in the 20th century. Gas Engines and Co-generation Papers Presented at a Seminar Organized by the Combustion Engines Group of the Institution of Mechanical Engineers, and Held at the National Motor Museum, Solihull, West Midlands, on 10/11 May 1990 Britain was one of the pioneers of the use of sewage gas in engines and in the use of a range of gaseous fuels in dual fuel engines. Gas engines,

usually spark ignited, have probably been most widely used in the USA. Today, there is world-wide interest in using natural gas in IC engines for power generation and in heat recovery. Cogeneration is commercial in more and more countries as power demands exceed installed capabilities. combustion under any normal regime produces virtually no carbon (soot) nor hydrocarbons heavier than methane. For a given energy release, Methane produces less CO<sub>2</sub> than any other hydrocarbon fuel. Nox control from its in IC engines is possible by using lean-burn techniques or catalytic control. packaged cogeneration; catalytic exhaust gas cleaning for engines used in cogeneration; emission control for IC including diesel engines; oxygen control for gas engines with catalytic convertors; controls and monitoring of gas engines; a model to predict performance and heat release in dual-fuel diesel engines.
