THE 23RD CYCLE

LEARNING TO LIVE WITH A STORMY STAR

Columbia University Press On March 13, 1989, the entire Quebec power grid collapsed, automatic garage doors in California suburbs began to open and close without apparent reason, and microchip production came to a halt in the Northeast; in space, communications satellites had to be manually repositioned after flipping upside down, and pressure readings on hydrogen tank supplies on board the Space Shuttle Discovery peaked, causing NASA to consider aborting the mission. What was the cause of all these seemingly disparate events? Sten Odenwald gives convincing evidence of the mischievous—and potentially catastrophic—power of solar storms and the far-reaching effects of the coming "big one" brewing in the sun and estimated to culminate in the twenty-third cycle in the year 2001 and beyond. When the sun undergoes its cyclic "solar maximum," a time when fierce solar flares and storms erupt, fantastic auroras will be seen around the world. But the breathtaking spectacles will herald a potentially disastrous chain of events that merit greater preparation than Y2K. Is anyone listening? The 23rd Cycle traces the previously untold history of solar storms and the ways in which they were perceived by astronomers—and even occasionally covered up by satellite companies. Punctuated with an insert containing dramatic color images showing the erupting sun, the book also includes a history of the record of auroral sightings, accounts of communications blackouts from the twentieth century, a list of industries sensitive to solar storms, and information about radiation and health issues.

CODE OF PRACTICE FOR ELECTRIC VEHICLE CHARGING EQUIPMENT INSTALLATION

let Standards The Code of Practice for Electric Vehicle Charging Equipment Installation, 3rd Edition has been updated to align with the current requirements of BS 7671. THE PROFESSIONAL DIPLOMAT

Princeton University Press The role of the Foreign Service Officer of the United States altered radically during and after World War II. John Harr, who served as a staff member of the Commission on Foreign Affairs Personnel in 1962 and as Director of the Office of Management Planning in the State Department for four years, describes the changes and the response of the Foreign Service Corps to them. He provides a direct approach to the understanding of the professional diplomat and of the pervasive force of professionalism in modern American society. He also outlines managerial strategy to meet the growth challenge of the future. Originally published in 1969. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
