## Tom Hartley

## The Dealmaker

*Veloce Publishing The car world is full of fascinating characters, but few have a story to tell quite as remarkable and inspirational as Tom Hartley. Walking out of school at the age of 11, unable to read or write, Hartley set up his own business buying and selling cars. From that moment, he defied logic and ripped up the rule book on his way to the top. Today he runs one of the most successful independent family run performance and luxury car businesses in the world. He has built up an unrivalled reputation as "The Dealmaker." Tom has been at the top for over 40 years, survived and thrived through four recessions, and overcome three life threatening illnesses. In his own brutally honest words, Hartley tells his gripping story of a boy from a traditional Romany family who swapped the classroom for the cut-throat world of Glasgow's car auctions, buying and selling his first car at the age of 12. Having*

*decided to drive himself around illegally, he was only 15 when he had his first car crash, and they don't come more spectacular than writing off a Ferrari Dino - nothing has ever been normal in the world of Tom Hartley! Hartley had made his first million by the age of 17, but soon suffered major setbacks as his business went bust, and he found himself at risk of losing his sight without major surgery. Hartley started all over again, living in a mobile home with his wife and working from the back of a car. He had gone from hero to zero, but his burning desire to be the best saw him climb his way back to the top. His ability to clinch deals in some of the most bizarre places has become legendary, like buying a car in a sauna, while stuck in a traffic jam on a motorway, and even in a swimming pool! Family has played a key part in the Tom Hartley story, his wife has been at his side all the way, and his two sons have followed closely in their father's footsteps. Indeed Tom's belief in family is one of the inspiring messages that comes through. Hartley's inspirational story is about the unshakeable belief in his own abilities, from a precocious schoolboy who had a dream, and then through sheer hard work and a burning desire to make the dream come true. This is not just a book for car enthusiasts but for anyone who has dared to dream. It's a story that will inspire and motivate, and proves you can make the wildest dream come true if you want it badly enough. Tom's remarkable story is written with the collaboration of journalist Ken Gibson, for 24 years, award-winning Motoring Editor of The Sun newspaper.*

# Operations Management in Automotive Industries

## From Industrial Strategies to Production Resources Management, Through the Industrialization Process and Supply Chain to Pursue Value Creation

*Springer Science & Business Media This book has proved its worth over the years as a text for courses in Production Management at the Faculty of Automotive Engineering in Turin, Italy, but deserves a wider audience as it presents a compendium of basics on Industrial Management, since it covers all major topics required. It treats all subjects from product development and “make or buy”-decision strategies to the manufacturing systems setting and management through analysis of the main resources needed in production and finally exploring the supply chain management and the procurement techniques. The very last chapter recapitulates the previous ones by analysing key management indicators to pursue the value creation that is the real purpose of every industrial enterprise. As an appendix, a specific chapter is dedicated to the basics of production management where all main relevant definitions, techniques and criteria are treated, including some numerical examples, in order to provide an adequate foundation for understanding the other chapters. This book will be of use not only to Automotive Engineering students but a wide range of readers who wish to gain insight in the world of automotive engineering and the automotive industry in general.*

## Kastenwagen als Reisemobil

### rund um Auswahl, Ausstattung und Ausbau

*BoD - Books on Demand Unser erstes Reisemobil war ein James Cook, ein Kastenwagen von Mercedes Benz mit Ausbau von Westfalia. Ein Typ 307 mit Hochdach, Automatik, einer Eberspächer Warmluftheizung, Hochbett, Schiebetür sowie Hecktüren. Der Ausbau war gut durchdacht, über die Hecktür konnte ich mein Surfbord, Gabelbaum und Mast von hinten bis vorne zum Armaturenbrett durchschieben. Wie auch die Bullis T2/T3 waren diese ausgebauten Transporter ideale Reisemobile, kompakt und wendig, ideal für Passstraßen, enge Bergdörfer und den Strand. Heute werden diese Fahrzeugtypen ergänzt durch Fiat Ducato und VW Crafter. Aber mit den vielen Varianten, die inzwischen auf dem Markt sind, beginnt sowohl für den Käufer als auch für den Ausbauer die Qual der Wahl. Mit oder ohne Hochdach? Mit Aufstelldach? Alles Fragen, die vor dem Erwerb geklärt sein sollten. Mögliche Antworten finden Sie in Teil I und Teil II dieses Buches. Der Teil III ist für den Ausbauer gedacht, es ist keine Ausbauanleitung für ein bestimmtes Fahrzeug oder eine bestimmte Ausstattung sondern soll Informationen zu Ausbau, Ausbauteilen, Chassis, Elektrik, handwerklichen Tätigkeiten und vielen Praxistipps und Anleitungen zusammenfassen. Für einen Ausbau gibt es im Web viele Beiträge und auf YouTube viele Filmchen. Bis Sie die aber alle gefunden und die Guten aus der Menge der vielen Schlechten aussortiert haben, haben Sie auch diese uncoole Art der Darstellung, nämlich dieses Buch gelesen. Und darin können Sie sogar nachschlagen und Anmerkungen machen! Was Sie übrigens bei den ganzen Filmchen nicht finden werden sind die verschiedenen Bestimmungen vom TÜV, VDE und DVGW etc. Auch diese wissenswerten Infos habe ich für Sie in diesem Buch zusammengestellt. In der Reihe Rund ums Wohnmobil sind außerdem noch vier weitere Bücher erschienen. Das Buch ABC rund ums Wohnmobil, das Buch Fahrzeugauswahl, Miete, Kauf und Reisevorbereitungen, das Buch Do it yourself rund ums Wohnmobil, sowie das Buch Strom und Spannung im Wohnmobil. Gutes Gelingen!*

## Green Logistics

## Improving the Environmental Sustainability of Logistics

*Kogan Page Publishers The transport, storage and handling of goods impose a heavy burden on the environment. As concern for the environment rises, companies must take more account of the external costs of logistics associated mainly with climate change, air pollution, noise, vibration and accidents. Leading the way in current thinking on environmental logistics, Green Logistics provides a unique insight on the environmental impacts of logistics and the actions that companies and governments can take to deal with them. It is written by a group of leading researchers in the field and provides a comprehensive view of the subject for students, managers and policy-makers. Fully updated and revised, the 3rd Edition of Green Logistics takes a more global perspective than previous editions. It introduces new contributors and international case studies that illustrate the impact of green logistics in practice. There is*

*a new chapter on the links between green logistics and corporate social responsibility (CSR) and a series of postscripts examining the likely effects of new developments, such as 3D printing and distribution by drone, on the environmental footprint of logistics. Other key topics examined in the book include: carbon auditing of supply chains; transferring freight to greener transport modes; reducing the environmental impact of warehousing; improving the energy efficiency of freight transport; making city logistics more environmentally sustainable; reverse logistics for the management of waste; role of government in promoting sustainable logistics. Ideal for use on related courses, the 3rd Edition of Green Logistics includes indispensable online supporting materials, including graphics, tables and chapter summaries, as well as technical information and guidelines for teachers and lecturers. The book is endorsed by the Chartered Institute of Logistics and Transport (CILT).*

## Technisch-wirtschaftliche Bewertung des Einsatzes von batterieelektrischen Nutzfahrzeugen in der Distribution von Konsumgütern

*Universitätsverlag der TU Berlin Die Anforderungen an die Konsumgüterdistribution verändern sich mit zunehmender Geschwindigkeit. Anhaltende Globalisierung, kürzere Produktlebenszyklen und Urbanisierung sowie neue Technologien sind Treiber dieser Veränderungen. Hinzu kommen die wachsende Bedeutung des Onlinehandels, steigender Kundenanforderungen hinsichtlich Geschwindigkeit, Flexibilität und Qualität der Belieferung, sowie ein steigendes Nachhaltigkeitsbewusstsein in der Bevölkerung. Es entsteht ein dynamisches und komplexes Marktumfeld für die in der Distribution von Konsumgütern im Wettbewerb stehenden Unternehmen. Die Dissertation befasst sich mit der Entwicklung eines Bewertungsmodells, um die Folgen des Einsatzes batterieelektrischer Nutzfahrzeuge in der Distribution von Konsumgütern technisch-wirtschaftlich bewerten zu können. Das entwickelte Bewertungsmodell wird im Rahmen dieser Dissertation exemplarisch an sechs abstrahierten Anwendungsfällen in drei Szenarien (2015, 2030 I und 2030 II) angewendet. Die Anwendungsfälle stammen den Bereichen der Lebensmittel-, Fashion- und KEP-Distribution und wurden anhand von neun Unternehmen erhoben. Die Ergebnisse der Arbeit zeigen, dass es im Besonderen die Nutzlast und die Anschaffungskosten von batterieelektrischen Nutzfahrzeugen sowie die Gewichtung der Nachhaltigkeitskennzahlen im Zielsystem des Anwenders von Elektromobilität in der Distribution sind, welche den technisch-wirtschaftlich vorteilhaften Einsatz der Elektromobilität (im Vergleich zu konventionell dieselbetriebenen Nutzfahrzeugen) determinieren. Diese Dissertation richtet sich*

*an Wissenschaftler sowie Fach- und Führungskräfte von in der Distribution tätigen Unternehmen, welche sich mit den Einsatzmöglichkeiten von batterieelektrischen Nutzfahrzeugen im Rahmen von Distributionsaktivitäten befassen und ihre technisch-wirtschaftlichen Implikationen abschätzen möchten. There are rapidly changing demands on the distribution of consumer goods in international trade. These changes are driven by increasing globalization of trade, decreasing product life cycles, urbanization and new technologies. Other trends affecting the distribution chain include the increasing role of e-commerce; an increasing consumer demand for shorter delivery times, flexibility and high quality of goods and services; and the growing awareness of environmental issues among customers. These changes have created a dynamic and complex market environment for companies in the distribution of consumer goods. This PhD thesis describes the development and evaluation of a model to assess the impact of electric vehicle usage on the distribution chain, addressing both technical and economical aspects. The model is then applied to six general cases in three scenarios (years 2015, 2030 I and 2030 II). These case examples are derived from a range of industries, including food, fashion and CEP distribution, and in particular from nine specific companies that were surveyed. Conventional diesel powered vehicles were used as the reference standard for determining the benefits of electric vehicle use. We found that the following factors determine the technical and economic benefits of electric vehicles: payload, acquisition cost for the vehicle, and the importance of environmental sustainability in the value system of the vehicle operating company. This thesis is targeted at economists and managers of companies with large distribution networks who wish to assess the technical and economic implications of using electric vehicles in their distribution networks.*

## Building a Special with Ant Anstead Master Mechanic

## Following the Build of Ant's Own Classic F1 Single-Seater

# Special

*Haynes Manuals Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.*

## Israel's Mediterranean Gas

# Domestic Governance, Economic Impact, and Strategic Implications

*Taylor & Francis This book examines the internal and external implications of Israel's natural gas discoveries in the Eastern Mediterranean. The nation's changed status from being an importer of coal and oil to that of an exporter of natural gas has consequences not only for the energy sector but also for the fragile geopolitics of the region. The book: Explores the challenges and issues of energy economics and governance; Analyses Israel's gas diplomacy with its neighbours in the Middle East and North Africa and its potential positive impact on the amelioration of the Arab-Israeli conflict; Studies how Israel can avoid the deleterious impact of the Dutch disease once the government's share of the export revenues start flowing. The author traces a consummate picture of history, politics, and conflicts that shape the economics of energy in Israel and its future trajectories. A major intervention in Middle East studies, this volume will be of great interest to scholars and researchers of energy studies, development studies, strategic studies, politics, diplomacy, and international relations. It will also be of interest to government agencies, think-tanks, and risk management firms.*
