KOMODO DRAGONS

BIOLOGY AND CONSERVATION

Smithsonian Institution *More than twenty years have passed since Walter Auffenberg's monumental The Behavioral Ecology of the Komodo Monitor. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."*

SOCIAL WORK IN XXI CENTURY ST. CHALLENGES FOR ACADEMIC AND PROFESSIONAL TRAINING.

Dykinson *The book that you hold in your hands or on the screen of any technological device is the result of the effort made by a group of professors with the collaboration of professionals in different universities and study centres in twenty-five countries. It is title is already revealing: Social Work in the 21st Century. It is remarkable the coordination of professors Concepción Nieto-Morales and Monica Solange De Martino Bermúdez for readers to know not only the curriculum of Social Work in each of the countries that appear, but also the profile of the student body and the identification and reflection on the challenges that the 21st century poses to the teaching of the profession, among other elements. Being a social worker in these times requires a previous awareness before starting the long road that begins with academic training and ends with the daily work linked to people who need help; they need us to help them to conquer their rights. There is something else. Social problems over the years seem not to change their name: homeless; drug addicts, minors... but we must know that the internal dynamics of these marginalized groups evolve over time. We must act according to today's situation, with today's schemes, otherwise the essence of social work will disappear.*

ONE HUNDRED YEARS OF SOCIAL WORK

A HISTORY OF THE PROFESSION IN ENGLISH CANADA, 1900-2000

Wilfrid Laurier Univ. Press *One Hundred Years of Social Work is the first comprehensive history of social work as a profession in English Canada. Organized chronologically, it provides a critical and compelling look at the internal struggles and debates in the social work profession over the course of a century and investigates the responses of social workers to several important events. A central theme in the book is the long-standing struggle of the professional association (the Canadian Association of Social Workers) and individual social workers to reconcile advancement of professional status with the promotion social action. The book chronicles the early history of the secularization and professionalization of social work and examines social workers roles during both world wars, the Depression, and in the era of postwar reconstruction. It includes sections on civil defence, the Cold War, unionization, social work education, regulation of the profession, and other key developments up to the end of the twentieth century. Drawing on extensive archival research as well as personal interviews and secondary literature, the authors provide strong academic evidence of a profession that has endured many important changes and continues to advocate for a just society and a responsive social welfare state. One Hundred Years of Social Work will be of interest to social workers, social work students and educators, social historians, professional associations and anyone interested in understanding the complex nature of people and institutions.*

SURVIVOR'S SONG

LIFE AND DEATH IN THE AFRICAN WILDERNESS

Harpercollins Pub Limited *The sequel to Cry of the Kalahari, this book takes up where the first began, with the Owenses returning to the Kalahari to continue their study of elephants. After deportation because of their open criticism of the government's soft stance on wildlife conservation, they find their way back to their research station to discover the remains of hundreds of poached elephants. Thus they begin a long struggle to raise consciousness about preservation among the officials, who live off black market ivory, and the villagers, who depend on elephant meat for food. Mark's obsession with catching the poachers leads to vicious confrontations and to intense strain in his relationship with Delia.*

THE UNITED STATES, IRAQ AND THE KURDS

SHOCK, AWE AND AFTERMATH

Routledge *This book provides a descriptive and analytical narrative of the evolution of US foreign policy towards Iraq at the supra-national (global), national (Arab Iraq) and sub-national (Iraqi Kurdistan) levels. The book is unique in that it presents a sophisticated insight into the two major components of US Iraq policy. To achieve this, it addresses US foreign policy towards both Arab Iraq and an entirely original analysis on US policy towards the Iraqi Kurds as components of a larger US Iraq policy, dictated by the supreme US Grand Strategy. The book also examines whether US foreign policy towards Iraq has been one of continuity or change – a dimension that has not been illustrated in any other publication. The book deals intelligently and at great length with the events surrounding US Iraq policy in three distinct phases, going back to, 1979 with regard to Arab Iraq, and 1961 in respect to the Kurdish liberation movement, covering all subsequent US administrations including the Obama presidency. It provides a thorough examination of US interests in Iraq and reasons for the 2003 invasion and its aftermath. It also engages with the intellectual roots of US foreign policy, presenting an intricate reaction of views, objectives and agendas. This work will be of interest to students and scholars of Middle East studies, US Foreign Policy and Security studies.*

(IN)SECURITY AND THE PRODUCTION OF INTERNATIONAL RELATIONS

THE POLITICS OF SECURITISATION IN EUROPE

Routledge *This book provides a framework for analysing the interplay between securitisation and foreign affairs, reconnecting critical security studies with traditional IR concerns about interstate relations. What happens to foreign policymaking when actors, things or processes are presented as threats? This book explains state behaviour on the basis of a reflexive framework of insecurity politics, and argues that governments act on the knowledge of international danger available in their societies, but that such knowledge is organised by markedly varying ideas of who threatens whom and how. The book develops this argument and illustrates it by means of various European case studies. Moving across European history and space, these case studies show how securitisation has projected evolving and often contested local ideas of the organisation of international insecurity, and how such knowledges of world politics have then conditioned foreign policymaking on their own terms. With its focus on insecurity politics, the book provides new perspectives for the study of international security. Moving the discipline from systemic theorising to a theory of international systematisation, it shows how world politics is, in practice, often conceived in a different way than that assumed by IR theory. By the same token, by depicting national insecurity as a matter of political construction, the book also raises the challenging question of whether certain projections of insecurity may be considered more warranted than others. This book will be of much interest to students of critical security studies, European politics, foreign policy and IR, in general.*

BEYOND THE IVORY TOWER

INTERNATIONAL RELATIONS THEORY AND THE ISSUE OF POLICY RELEVANCE

Columbia University Press The gap between academics and practitioners in international relations has widened in recent years, according to the authors of this book. Globalization, ethnic conflict, and ecological threats have created a new set of issues that challenge policymakers, and cutting-edge scholarship can contribute a great deal to the diagnosis and handling of potentially explosive situations.

BEYOND SECURITY, ETHICS AND VIOLENCE

WAR AGAINST THE OTHER

Routledge In a world plagued by war and terror, *Beyond Security, Ethics and Violence* sounds a warning: not only are global patterns of insecurity, violence and conflict getting ever more destructive and out of hand, but the ways we understand and respond to them will only prolong the crisis. When security is grounded in exclusion and alienation, ethics licenses killing and war, and freedom is a mask for imperial violence, how should we act? Anthony Burke offers a groundbreaking analysis of the historical roots of sovereignty and security, his critique of just war theory, and important new essays on strategy, the concept of freedom and US exceptionalism. He pursues critical engagements with thinkers such as Giorgio Agamben, Hardt and Negri, Emmanuel Levinas, Carl Von Clausewitz, Jean Bethke Elshtain, Michael Walzer, Michel Foucault and William Connolly. Combining a diversity of critical thought with analyses of the War on Terror, Iraq, the Israeli-Palestinian conflict, the Vietnam War, the Indonesian crisis, globalization and the new drive for empire, Burke refuses easy answers, or to abandon hope. This innovative study will be of interest to students and researchers of politics and international relations, security studies, social and cultural theory and philosophy.

ANSWER BOOK TO ACCOMPANY INTEGRATED ELECTRONICS

INTEGRATING INFORMATION TECHNOLOGY INTO THE TEACHER EDUCATION CURRICULUM

PROCESS AND PRODUCTS OF CHANGE

Routledge As teaching evolves, teacher education must keep up. This book examines systemic reforms that incorporate new technology to improve any teacher education program. While there are books that address the integration of technology into teaching curricula, very few address the process for teacher education faculty and the systemic reform of a teacher education program. *Integrating Information Technology into the Teacher Education Curriculum: Process and Products of Change* provides practical examples and suggestions for teacher education departments striving to integrate new technologies into their curriculum. It will help in the effort to motivate faculty to make utilizing new technology a natural strategy for the teachers they are educating. It describes the creation of Design Teams at Brigham Young University's McKay School of Education (funded by a PT3 grant) and how these teams worked to successfully reconfigure the school's teacher preparation curricula. *Integrating Information Technology into the Teacher Education Curriculum* examines: how to compose and create a curriculum design team—including both teacher education and content-specific methods instructors training and collaboration opportunities that focus on the infusion of technology how to facilitate alignment among a university, cooperating school districts, the State Office of Education, and other available teacher preparation programs specific case examples of the redevelopment of teacher education courses by the instructors who teach them the process of changing a technology course required by the teacher education program the process of extending grant activities to the university's partner school districts and the State Office of Education From the editors: *Preparing tomorrow's teachers to use technology in schools is a complex endeavor requiring the infusion of technology into curriculum and instructional practices at all levels of the pre-service program. In many early teacher education programs, prospective teachers took a computer literacy class separate from content methods classes and rarely engaged in real collaboration on how schoolteachers could integrate technology into authentic learning experiences. By focusing merely on how to use computers, technology training failed by not addressing how to teach students more effectively using a variety of technological tools. What teachers need to know most is how to teach content more effectively. Technology integration should cause teachers to develop different perspectives through rethinking teaching and learning. Teaching with technology causes teachers to confront their established beliefs about instruction and their traditional roles as classroom teachers.*

ONTOLOGICAL SECURITY IN INTERNATIONAL RELATIONS

SELF-IDENTITY AND THE IR STATE

Routledge The central assertion of this book is that states pursue social actions to serve self-identity needs, even when these actions compromise their physical existence. Three forms of social action, sometimes referred to as 'motives' of state behaviour (moral, humanitarian, and honour-driven) are analyzed here through an ontological security approach. Brent J. Steele develops an account of social action which interprets these behaviours as fulfilling a nation-state's drive to secure self-identity through time. The anxiety which consumes all social agents motivates them to secure their sense of being, and thus he posits that transformational possibilities exist in the 'Self' of a nation-state. The volume consequently both challenges and complements realist, liberal, constructivist and post-structural accounts to international politics. Using ontological security to interpret three cases - British

neutrality during the American Civil War (1861-1865), Belgium's decision to fight Germany in 1914, and NATO's (1999) Kosovo intervention - the book concludes by discussing the importance for self-interrogation in both the study and practice of international relations. *Ontological Security in International Relations* will be of particular interest to students and researchers of international politics, international ethics, international relations and security studies.

PROCESSING MATHEMATICS THROUGH DIGITAL TECHNOLOGIES

Springer Science & Business Media Digital technologies permeate our lives. We use them to communicate, research, process, record, and for entertainment. They influence the way we interact in the world, the way we live. Digital technologies also offer the potential to transform the nature of the learning process in mathematics. The learning environment, the types of tasks learners can engage with, and the nature of that engagement differs from working in other environments. The Internet, for instance, presents greater scope for child-centered, inquiry-based learning. Dynamic geometry software and GoogleEarth offer interactive ways of exploring shape, position and space that is not possible with the pencil-and-paper medium. This book provides insights into how mathematical understanding emerged for primary-aged children (5-13 years) when they investigated mathematical tasks through digital media. It considers learning theories that are frequently used in mathematics education, and situates a contemporary interpretive approach within those perspectives. A key purpose was to provide some practical tasks for teachers/teacher educators to incorporate digital technologies into their mathematics programmes, tasks that have been used successfully for learning. This is a significant reference book for primary-school teacher education and a valuable resource for all schools teaching at that age.

CONDUCTING META-ANALYSIS USING SAS

Psychology Press *Conducting Meta-Analysis Using SAS* reviews the meta-analysis statistical procedure and shows the reader how to conduct one using SAS. It presents and illustrates the use of the PROC MEANS procedure in SAS to perform the data computations called for by the two most commonly used meta-analytic procedures, the Hunter & Schmidt and Glassian approaches. This book serves as both an operational guide and user's manual by describing and explaining the meta-analysis procedures and then presenting the appropriate SAS program code for computing the pertinent statistics. The practical, step-by-step instructions quickly prepare the reader to conduct a meta-analysis. Sample programs available on the Web further aid the reader in understanding the material. Intended for researchers, students, instructors, and practitioners interested in conducting a meta-analysis, the presentation of both formulas and their associated SAS program code keeps the reader and user in touch with technical aspects of the meta-analysis process. The book is also appropriate for advanced courses in meta-analysis psychology, education, management, and other applied social and health sciences departments.
