Changing Policies to Close the Achievement Gap

A Guide for School System Leaders

R&L Education In this guide, Cynthia D. Prince identifies state and local policies that tend to make the achievement gap worse and describes policy changes that superintendents have made with the support of their boards to help narrow the gap. She also examines policies that aggravate the inequitable distribution of quality teachers and principals, that restrict student access to challenging coursework, and that reduce academic instruction time.

Creating School Partnerships that Work

A Guide for Practice and Research

IAP THIS IS A UNIQUE BOOK. IF YOU CARE ABOUT SCHOOLS AND SCHOOLING AND THE WAY IN WHICH PARTNERSHIPS MAY HELP TO STRENGTHEN AND IMPROVE THEM AND THE INSTITUTIONS THAT PARTNER WITH THEM, YOU SHOULD READ IT! School partnerships have a long history in the United States. The inception of public schooling was a type of partnership with the community. The concept of local school boards and local control was integral to the establishment of schools and the idea that public education was a public good has deep roots in the country. Partnerships denote relationships which are mutually beneficial to the parties involved and which result in joint benefits for those who create and engage in them. The partnerships presented in this book provide ample evidence of the value and benefits of these arrangements. The book contains stories and research about school partnerships from a variety of groups and perspectives, which are focused upon multiple issues within educational institutions and communities within the United States. The final chapter, presents an analysis across all the partnerships to identify the elements that fostered and hindered their success and the primary lessons learned. This analysis should provide meaningful information for those engaged in developing and operating similar partnerships or those involved in conducting research on or about them. Although the cases presented in this book occur within the United States, the findings may also have relevance for similar initiatives in other countries. Praise for *Creating School Partnerships that Work: A Guide for Practice and Research*: Kudos to Dana Griggs and Frances Kochan for compiling the rich accountings of eight different school partnerships all in one place. Readers will learn a great deal from both the individual accountings of a broad array of partnerships as well as the collective analysis of the partnerships and lessons learned across them. *Creating School Partnerships that Work: A Guide for Research and Practice* is a must-read book for anyone who ever has been, is, or desires to be involved in any type of school partnership. Nancy Fichtman Dana, Professor, School of Teaching and Learning University of Florida, Gainesville *Creating School Partnerships that Work: A Guide for Research and Practice* is a must read for scholars, researchers, practitioners, and community members seeking to identify elements of successful school partnerships that foster students' academic and personal successes. This edited volume shares stakeholders' perspectives on multi-dimensional school partnerships, which have successfully led to sustained collaborations across diverse purposes that are mutually beneficial for all groups. The usefulness of the content analysis presented in the final chapter, which identifies elements both fostering and hindering partnerships with recommendations, cannot be overstated. Mary Barbara Trube, Professor Emerita, Ohio University-Chillicothe Contributing Faculty & Dissertation Mentor, Walden University Early Childhood Education Adjunct Faculty, Florida SouthWestern State College Mentor & Early Childhood Consultant, ILEAD Xi'an Jiaotong-Liverpool University

Heritage Language Education

A New Field Emerging

Routledge "... focuses on issues at the forefront of heritage language teaching and research. Its state-of-the-art presentation will make this volume a standard reference book for investigators, teachers, and students. It will also generate further research and discussion, thereby advancing the field." María Carreira, California State University - Long Beach, United States "In our multilingual and multicultural society there is an undeniable need to address issues of bilingualism, language maintenance, literacy development, and language policy. The subject of this book is timely.... It has potential to make a truly significant contribution to the field." María Cecilia Colombi, University of California - Davis, United States This volume presents a multidisciplinary perspective on teaching heritage language learners. Contributors from theoretical and applied linguistics, sociolinguistics, psychology, educational policy, and pedagogy specialists explore policy and societal issues, present linguistic case studies, and discuss curricular issues, offering both research and hands-on innovation. - The term "heritage language speaker" refers to an individual exposed to a language spoken at home but who is educated primarily in English. Research and curriculum design in heritage language education is just beginning. Heritage language pedagogy, including research associated with the attrition, maintenance, and growth of heritage language proficiency, is rapidly becoming a field in its own right within foreign language education. This book fills a current gap in both theory and pedagogy in this emerging field. It is a significant contribution to the goals of formulating theory, developing informed classroom practices, and creating enlightened programs for students who bring home-language knowledge into the

classroom. Heritage Language Education: A New Field Emerging is dedicated to Professor Russell Campbell (1927-2003), who was instrumental in advocating for the creation of the field of heritage language education.

California Dropouts

A Status Report

Reforming Teacher Education

Something Old, Something New

Rand Corporation Looks at the progress of the colleges and universities involved in the Teachers for a New Era (TNE) initiative.

A Race Against Time

The Crisis in Urban Schooling

Greenwood Publishing Group With the aim of improving urban school performance and student outcomes, three approaches to the reform of urban school governance are presented and the potential advantages and disadvantages of each are discussed.

The Politics of Urban Education Reform

Temple University Press Is anyone listening to minority voices in reforming American schools?

Continua of Biliteracy

An Ecological Framework for Educational Policy, Research, and Practice in Multilingual Settings

Multilingual Matters Biliteracy - the use of two or more languages in and around writing- is an inescapable feature of lives and schools worldwide, yet one which most educational policy and practice continue blithely to ignore. The continua of biliteracy featured in the present volume offers a comprehensive yet flexible model to guide educators, researchers, and policy-makers in designing, carrying out, and evaluating educational programs for the development of bilingual and multilingual learners, each program adapted to its own specific context, media, and contents.

School, Family, and Community Partnerships

Your Handbook for Action

Corwin Press Strengthen family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, this fourth edition of a bestseller provides tools and guidelines to use to develop more effective and equitable programs of family and community engagement. Written by a team of well-known experts, this foundational text demonstrates a proven approach to implement and sustain inclusive, goal-oriented programs. Readers will find: Many examples and vignettes Rubrics and checklists for implementation of plans CD-ROM complete with slides and notes for workshop presentations

School Choice at the Crossroads

Research Perspectives

Routledge School Choice at the Crossroads compiles exemplary, policy-relevant research on school choice options—voucher, private, charter, and traditional public schools—as they have been implemented across the nation. Renowned contributors highlight the latest rigorous research findings and implications on school vouchers, tuition tax credits, and charter schools in states and local areas at the forefront of school choice policy. Examining national and state-level perspectives, each chapter discusses the effects of choice and vouchers on student outcomes, the processes of choice, supportive conditions of school choice programs, comparative features of school choice, and future research. This timely volume addresses whether school choice works, under what conditions, and for whom—further informing educational research, policy, and practice.

Developing Assessments for the Next Generation Science Standards

National Academies Press Assessments, understood as tools for tracking what and how well students have learned, play a critical role in the classroom. Developing Assessments for the Next Generation Science Standards develops an approach to science assessment to meet the vision of science education for the future as it has been elaborated in A Framework for K-12 Science Education (Framework) and Next Generation Science Standards (NGSS). These documents are brand new and the changes they call for are barely under way, but the new assessments will be needed as soon as states and districts begin the process of implementing the NGSS and changing their approach to science education. The new Framework and the NGSS are designed to guide educators in significantly altering the way K-12 science is taught. The Framework is aimed at making science education more closely resemble the way scientists actually work and think, and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time. It structures science education around three dimensions - the practices through which scientists and engineers do their work, the key crosscutting concepts that cut across disciplines, and the core ideas of the disciplines - and argues that they should be interwoven in every aspect of science education, building in sophistication as students progress through grades K-12. Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework. This report reviews recent and current work in science assessment to determine which aspects of the Framework's vision can be assessed with available techniques and what additional research and development will be needed to support an assessment system that fully meets that vision. The report offers a systems approach to science assessment, in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another. Developing Assessments for the Next Generation Science Standards makes the case that a science assessment system that meets the Framework's vision should consist of assessments designed to support classroom instruction, assessments designed to monitor science learning on a broader scale, and indicators designed to track opportunity to learn. New standards for science education make clear

that new modes of assessment designed to measure the integrated learning they promote are essential. The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students.

The Oxford Handbook of Language and Society

Oxford University Press Contributors explore a range of sociolinguistic topics, including language variation, language ideologies, bi/multilingualism, language policy, linguistic landscapes, and multimodality. Each chapter provides a critical overview of the limitations of modernist positivist perspectives, replacing them with novel, up-to-date ways of theorizing and researching. [Publisher]

Leadership

High-School Biology Today and Tomorrow

National Academies Biology is where many of science's most exciting and relevant advances are taking place. Yet, many students leave school without having learned basic biology principles, and few are excited enough to continue in the sciences. Why is biology education failing? How can reform be accomplished? This book presents information and expert views from curriculum developers, teachers, and others, offering suggestions about major issues in biology education: what should we teach in biology and how should it be taught? How can we measure results? How should teachers be educated and certified? What obstacles are blocking reform?
