Health Assessment in Nursing is a colorful, user-friendly introductory level health assessment text for RN-level students. Targeted to ADN and BSN programs, this text presumes no prior knowledge of health assessment and is part of a suite that includes Lab Manual to Accompany Health Assessment in Nursing, Nurses' Handbook of Health Assessment, and Weber & Kelley's Interactive Nursing Assessment. For this edition, the COLDSPA mnemonic, which guides students through investigation of symptoms, has been revised to show specific applications to content in each chapter. A sample application of COLDSPA is presented at the beginning of each chapter's Nursing History section, and another accompanies each case study. The Frail Elderly chapter has been streamlined, with a stronger focus on the normal variations associated with assessment of elderly clients.

Health Assessment in Nursing

Bonus: New FREE CD-ROM features interactive case studies, health promotion schedules & guidelines and special checklists and tools for domestic violence, pain and mental health assessment. Now in its Second Edition, this ideal text for nursing students features physical examination, history taking and health status assessment. Newly formulated into vertically set three portrait columns, its distinguishing emphasis on analysis of collected data and coverage of practical applications is clearly presented and user-friendly. Additional chapters include geriatrics and information on why and how to incorporate cultural, familial and community data into a patient assessment. Newly designed Risk Factor Displays list possible and actual risk factors, risk reduction tips and cultural considerations. A free CD-ROM of head-to-toe assessment is in the back of the book. A separate lab manual and a companion website on connection are also available.

Pathophysiology

Concepts of Altered Health States

Lippincott Williams & Wilkins **This is the Eighth Edition of the comprehensive and well-respected text and reference of pathophysiology. As a nurse-physiologist, Carol Porth uniquely emphasizes "concepts" of altered health states, as opposed to factual descriptions of diseases and disorders. By taking this physiologic approach, the author ensures a comprehension of the whole of body function and both the physical and psychological aspects of altered health. This edition has a completely revamped art program and new displays that showcase pathophysiological processes through detailed visual representation. Other highlights include a greater international focus, expanded content on evidence-based practice and completely revised, updated chapters on genetics, disorders of white blood cells and lymphoid tissues, and innate and acquired immunity.**
