OECD Employment Outlook 2016 OECD This 2016 edition of the OECD Employment Outlook provides an in-depth review

of recent labour market trends and short-term prospects in OECD countries. Chapter 1 examines recent labour market developments, with a special focus on vulnerable youth who are neither working nor in education or training. The size of this group has grown in recent years in many OECD countries and governments will need to take vigorous policy measures if they are to meet the target, recently adopted by G20 governments, of reducing the share of youth who are vulnerable by 15% by 2025. Chapter 2 considers skills use at work: are countries doing enough to assure that workers are able to make full use of their skills on the job? Chapter 3 looks at the short-term effects of structural reforms on employment and identifies successful strategies for reducing transition costs. Chapter 4 looks at how to close the labour market gender gap in emerging economies, proposing a comprehensive policy response to the problem. Whilst a good deal of these new jobs have been created in high-tech and/or knowledge-intensive sectors providing workers with decent pay, job security, training and career development prospects, a significant share of jobs,

particularly in labour-intensive service sector industries fail to do so. This volume provides new perspectives on this highly debated and policy relevant issue. **OECD Employment Outlook 2004** OECD Publishing OECD's annual assessment of labour market developments and prospects in the OECD area. What We Owe Each Other A New Social Contract for a Better Society Princeton University Press From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. Minouche Shafik takes us through stages of life we all experience—raising children, getting educated, falling ill, working, growing old—and shows how a reordering of our societies is possible. Drawing on evidence and examples from around the world, she shows how every country can provide citizens with the basics to have a decent life and be able to contribute to society. But we owe each other more than this. A more generous and inclusive society would also share more risks collectively and ask everyone to contribute for as long as they can so that everyone can fulfill their potential. What We Owe Each Other identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, What We Owe Each Other provides practical solutions to current challenges and demonstrates how we can build a better society—together.
