OECD Reviews of Labour Market and Social Policies: Latvia 2016

OECD Publishing Latvia has undergone major economic and social change since the early 1990s. Despite an exceptionally deep recession following the global financial crisis, impressive economic growth over the past two decades has narrowed income and productivity gaps relative to comparator countries in the OECD.

OECD Reviews of Labour Market and Social Policies: Costa Rica

OECD Publishing Costa Rica has recorded many social and economic achievements and currently enjoys one of the highest levels of well-being in the OECD. But progress has come to a standstill in most recent years and challenges have emerged along several social and labour market dimensions.

OECD Reviews of Labour Market and Social Policies: Lithuania

OECD Publishing This report provides comprehensive analysis of Lithuania's policies and practices compared with best practice in the field of labour, social and migration from the OECD countries. It contains several recommendations to tackle key challenges facing Lithuania.

OECD Reviews of Labour Market and Social Policies: Colombia 2016

OECD Publishing This report examines labour market, social and migration policies in Colombia.

OECD Reviews of Labour Market and Social Policies: Israel

OECD Publishing OECD's review of labour market and social policy in Israel.

OECD Reviews of Labour Market and Social Policies: Colombia 2022

OECD Publishing In 2020, Colombia joined the OECD as the 37th Member of the Organisation, bringing to a successful conclusion an accession process that began in 2013. During the accession process, Colombia made important reforms and progress in the area of labour market and social policies, converging towards OECD best policies and practices.

Estonia

The Stationery Office Since Estonia regained its independence in 1991, its labour and social policies have been marked by a strong commitment to fiscal prudence, flexible markets, and work incentives. Labour market performance steadily improved during the mid-1990s and beyond, until the advent of the global economic crisis in 2008. Estonia was not well prepared for the slowdown and its economy has been hit especially hard. The downturn has required painful policy adjustments. Today, Estonia's public social spending remains among the lowest in the OECD; its social programmes support persons in need, but the benefits they receive are usually modest and some of the jobless receive no benefits. However, the country offers one of the world's most generous parental-benefit programmes and has begun to phase in a three-tier pension system. OECD Reviews of Labour Market and Social Policies

Costa Rica

- Foreword - Acronyms and Abbreviations - Executive summary - Assessment and recommendations - Strong socio-economic performance but progress has stalled recently in Costa Rica - Making a successful transition to a more inclusive labour market in Costa Rica - Reinforcing social policies for inclusive growth in Costa Rica - Making migration an opportunity for Costa Rica

OECD Reviews of Labour Market and Social Policies Chile

This report analyses in detail the implications of recent developments in Chile's labour market and social policy and considers the available policy options from the perspective of OECD countries' experience. The report finds that Chile has enjoyed rising living standards over two decades of strong economic growth. The incidence of poverty is now much lower and there is better access to adequate housing, education and healthcare. Nevertheless, Chile's income distribution remains disturbingly unequal by OECD standards. This is partly due to Chile's a relatively low employment rate, especially f.

OECD Reviews of Labour Market and Social Policies

Colombia 2016

This report examines labour market, social and migration policies in Colombia.

OECD Reviews of Vocational Education and Training Learning for Jobs

OECD Publishing **An OECD study of vocational education and training designed to help countries make their systems more responsive to labour market needs. It expands the evidence base, identifies a set of policy options and develops tools to appraise VET policy initiatives.**

OECD Reviews of Labour Market and Social Policies: Colombia 2022

In 2020, Colombia joined the OECD as the 37th Member of the Organisation, bringing to a successful conclusion an accession process that began in 2013. During the accession process, Colombia made important reforms and progress in the area of labour market and social policies, converging towards OECD best policies and practices. However, the OECD invited the Colombian government to continue its reform agenda in four areas in particular: (1) labour informality and subcontracting; (2) labour law enforcement; (3) collective bargaining; and (4) crimes against trade unionists. This report is the first assessment since Colombia's accession to the OECD.

Connecting People with Jobs Evaluating Latvia's Active Labour Market Policies

OECD Publishing **This report on Latvia is the sixth country study published in a series of reports looking into how policies connect people with jobs. It focuses on Latvia's long-term unemployed and those at risk of long-term unemployment.**

Improving the Performance of Health Care Systems

From Measures to Action (a Review of Experiences in Four OECD Countries)

There is growing interest in improving the performance of health systems in OECD countries. Many countries are developing initiatives to measure performance to guide and inform the improvement process. Indeed, measurement and improvement are increasingly linked, as is indicated by familiar phrases such as 'evidence-based medicine' and 'evidence-based policy'. This paper summarises the findings of an investigation of recent initiatives to better measure and improve health performance in four OECD countries: France, the Netherlands, New Zealand and Sweden. It highlights a number of case studies in these countries, which have been chosen to illustrate initiatives to improve performance, which paid greater or lesser attention to measurement issues. An attempt has also been made to describe the role of institutional arrangements as well as various policy and management "levers" which are used to bring about change. The case studies and discussion presented in this paper draw upon a more ...

OECD Employment Outlook 2014

OECD Publishing The OECD Employment Outlook 2014 includes chapters on recent labour market developments with a special section on earnings, job quality, youth employment, and forms of employment and employment protection.

What We Owe Each Other

A New Social Contract for a Better Society

Princeton University Press From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. Minouche Shafik takes us through stages of life we all experience—raising children, getting educated, falling ill, working, growing old—and shows how a reordering of our societies is possible. Drawing on evidence and examples from around the world, she shows how every country can provide citizens with the basics to have a decent life and be able to contribute to society. But we owe each other more than this. A more generous and inclusive society would also share more risks collectively and ask everyone to contribute for as long as they can so that everyone can fulfill their potential. What We Owe Each Other identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, What We Owe Each Other provides practical solutions to current challenges and demonstrates how we can build a better society—together.

Connecting People with Jobs Improving the Provision of Active Labour Market Policies in Estonia

OECD Publishing This report on Estonia is the seventh country study published in a series of reports looking into how policies connect people with jobs. It discusses the set-up and performance of active labour market policies (ALMPs) in Estonia.

OECD Reviews of Labour Market and Social Policies: Slovenia 2009

OECD Publishing This report analyses the main challenges for labour market and social policies in Slovenia and considers the available policy options from the perspective of OECD countries' experience.

OECD Reviews of Labour Market and Social Policies: Russian Federation 2011 (Russian version)

(Russian version)

OECD Publishing The global financial crisis interrupted a protracted period of strong economic growth in the Russian Federation. Despite a large decline in output, job losses and hikes in unemployment remained rather modest, and much of the labour market adjustment took place through reduced working hours and, in particular, real wages. Notwithstanding the recent recovery, the Russian labour market remains characterised by significant structural imbalances resulting in widespread segmentation and large earnings inequalities. To improve the balance between labour market flexibility and the protection of workers, the Russian Federation needs to reinforce its labour market institutions. Poverty and income inequalities remain well above the OECD average. Family policy is focused on increasing birth rates, but is ineffective in reducing poverty as working adults and children make up 60% of the poor. Instead, social policy is focused on the elderly and disabled, and in recent years there has been significant increases in transfer payments to pensioners. Recent reform is likely to "eradicate" poverty among pensioners, as measured by official benchmarks, but raises questions about the long-term financial sustainability of the private pensions system. Rapid population ageing further contributes to the need to raise the low standard pensionable ages in Russia and limit access to early pensions. The challenge for Russia will be to rebalance its social policy towards more effective support for parents to combine work and family life.

OECD Employment Outlook 2001 June

June

OECD Publishing Provides an annual assessment of labour market developments and prospects in the OECD area. This edition includes chapters on poverty dynamics, service sector jobs, the work-family balance, and foreign workers. A Statistical Annex is provided.

The Future of Social Protection What Works for Non-standard Workers?

What Works for Non-standard Workers?

OECD Publishing Social protection systems are often still designed for the archetypical full-time dependent employee. Work patterns deviating from this model - be it self-employment or online "gig work" - can lead to gaps in social protection coverage. Globalisation and digitalisation are likely to exacerbate ...

Digitalization, Immigration and the Welfare State

Edward Elgar Publishing The Swedish welfare state finds itself in the middle of two major upheavals: The impact of technology and immigration. Having taken in more refugees per capita than most other countries, the pillars of the welfare state are being shaken. Digital technologies are set to strengthen already existing trends towards job and wage polarization. This book explores how these trends are more pronounced due to the rigidity of the labor market and the comprehensiveness of tax-financed welfare services.

OECD Labour Force Statistics 2020

OECD Publishing This annual edition of Labour Force Statistics provides detailed statistics on labour force, employment and unemployment, broken down by gender, as well as unemployment duration, employment status, employment by sector of activity and part-time employment...

Media Practices and Protest Politics

How Precarious Workers Mobilise

Ashgate Publishing, Ltd. How do precarious workers employed in call-centres, universities, the fashion industry and many other labour markets organise, struggle and communicate to become recognised, influential political subjects? "Media Practices and Protest Politics; How Precarious Workers Mobilise" reveals the process by which individuals at the margins of the labour market and excluded from the welfare state communicate and struggle outside the realm of institutional politics to gain recognition in the political sphere. In this important and thought provoking work Alice Mattoni suggests an all-encompassing approach to understanding grassroots political communication in contemporary societies. Using original examples from precarious workers mobilizations in Italy she explores a range of activist media practices and compares different categories of media technologies, organizations and outlets from the printed press to web application and from mainstream to alternative media. Explaining how activists perceive and understand the media environment in which they are embedded the book discusses how they must interact with a diverse range of media professionals and technologies and considers how mainstream, radical left-wing and alternative media represent protests. Media Practices and Protest Politics offers important insights for understanding mechanisms and patterns of visibility in struggles for recognition and redistribution in post-democratic societies and provides a valuable contribution to the field of political communication and social movement studies.

OECD Reviews of Labour Market and Social Policies OECD Reviews of Labour Market and Social Policies: Slovenia 2009

OECD Publishing This report analyses the main challenges for labour market and social policies in Slovenia and considers the available policy options from the perspective of OECD countries' experience.
