KEY=ONE - MOORE MOODY

ONE MONTH TO YOUR OWN ONLINE BUSINESS

Createspace Independent Publishing Platform In the 1990s, the nascent internet was commonly referred to as the "information superhighway," a phrase that was coined by Senator Al Gore in 1978 according to most reports. The funny thing is, even though it seems to be a very dated phrase to modern ears, it is still essentially true. The vast majority of people still use the internet as a source of information first and foremost, and this in itself should be no surprise. Although this is open to debate, there is probably not a library or museum where there is more information available than there is on the internet, and of course, the internet has the vast advantage over every library and museum of being accessible at your fingertips - but there is no doubt that the nature of the internet is changing, and doing so at a pace that almost defies belief. For example, while some brave and hardy souls had tried to publish video materials on the internet previously, it was really only with the advent of YouTube that video took off, and that is less than four years ago as I write (YouTube was launched in February 2005). Yet video is now such an integral part of the everyday internet experience that it is hard to believe that there was a time BV (before video), a time when the internet was all about providing information only in written format accompanied by static images. Another huge change that has become increasingly evident over the last 3 or 4 years is the boom in business that is being transacted solely through the medium of the internet. From massive monolithic global corporations like Google to people spending their evenings working away in their back bedroom, there are now millions of companies and individuals who are operating a business where they make money from the internet. This is not new. There were companies making money on the internet back in the 'information superhighway' days, which helped to fuel the .com boom and subsequent implosion at the end of the 90s. But what is new and different is the fact that anyone who has an internet connection and a computer can now start their own internet marketing business quickly, easily and with very little capital outlay. Indeed, it is the latter fact that is one of the primary attractions of starting a business online, particularly in comparison to starting a 'real world' business where you would need offices, computers, telephones and staff. All of this is before you even start talking about investing money in inventory or stock, training costs and the like. To start your own online business, all you need is a computer and a connection. Well, actually, that's not strictly true...

INTERNET PROFIT SYSTEM

IF YOU COULD START YOUR OWN ONLINE BUSINESS, IN JUST A WEEK OR TWO, WITH ALMOST NO EXPENSE TO GET STARTED... WOULD YOU DO IT?

Yes, you really can get your own Internet business started in just a few weeks. It's a lot simpler than you might think. Before I go any further, I want to make it clear that I am not talking about shady "get rich quick" schemes or questionable biz-ops or low-paying "work at home" plans. I'm also not talking about selling other people's products through drop-shipping or affiliate programs. I'm talking about you selling your own products, that you create. I'm talking about a real business, with real products that you can be proud of. And a real potential for significant long-term income. How much? I can't say. I don't know you personally. The real question to ask yourself is, how much do you want, and how badly do you want it? I have friends who only put in a few hours and make a few hundred extra each month. They see it as a fun and easy way to add to their retirement investments. I have friends who make thousands a month. And I have other friends who make tens of thousands a month. All of it online. And almost without exception, every single person I've ever met who made a serious income online started with one of the ideas you're about to learn. What you make personally depends on you, your goals and your willingness to do a little creative thinking. I can tell you that the amount of work involved is probably a lot less than you think right now. I'm not going to give you fairy stories here, though. Some people will try this and fail. It happens. They don't listen, or they get stuck on one idea and refuse to try something else when it's clear the first one won't work. Worse, they try to create something that no-one else in the whole world cares about. Instead of adjusting their approach and giving people what they already want, these folks try

and "educate the market." Be warned: Even the most experienced and well-funded marketers won't touch that sort of thing. People want what they want, and they don't want someone telling them what they should want. Especially when that someone just happens to be selling it... Other than just not trying, the single biggest cause of failure in online business is trying to sell something no-one wants. If you can keep that one thing in mind, your odds of making a lot of money online just went way up.

SELL IT ONLINE 2

HOW TO MAKE MONEY WITH YOUR OWN WEBSITE, BLOG, KINDLE BOOK, OR BY COACHING & TRAINING

CreateSpace Do you want to Make money online, but without all the hassle of selling on eBay or Amazon? My previous book Sell It Online covered several ways to make money online: Selling on eBay, Amazon, Fiverr, and Etsy. This book offers four other approaches where you're not so much selling, as sharing the knowledge you have. I have personally used each of these methods. They have worked well for me and other people that I know. They can work for you, as well, if you follow the directions, and give them a chance. There are as many ways to make money online as there are stars in the sky. To make the cut for this book, each of the methods given had to meet the following criteria. 1) You need to be able to get started for under \$100. My thought is, most people who want to start an online business, don't want to put a lot of money into it. If you make the barrier too high, people are going to be afraid to take the leap. One hundred bucks seems like a hurdle most people will be able to make. 2) It's got to be so easy to get started your grandmother could do it. Face it, I can give you step-by-step instructions to build a nuclear device, but you're not going to do it if the instructions are overly complicated. 3) It has to put money in your pocket within 90 days. No one wants to wait forever to see their business payoff. Every one of the businesses, I'm going to share with you has the potential to put some jingle in your pocket within 90 days. Several of them can bring you cash in the first week, or two. Kindle Book Marketing I liken Kindle to the new internet gold rush. All of the gurus out there are sharing stories about five or six lucky authors who have managed to make hundreds of thousands of dollars from their Kindle books. That much is true. A few people have made some really big bucks promoting their Kindle books. Another truth is, most people who publish a Kindle book, end up watching it wither and die in no time at all. The lucky ones sell one hundred copies a year; the not so lucky ones sell three or four copies. But, then they run out of mothers, grandmothers, and best friends to keep their sales going. With that said, there is a middle group of Kindle authors, selling five hundred to two thousand copies of their books every month. Many of them are pulling down a cool \$1000 to \$5000 per month in royalties. In this section we will explore the latter group of Kindle authors, and lay out their secrets for success. Local employment website or local portal This is a specialized market not many people are aware of. It is easy to break into. In as little as six months you can be pulling down \$1000 or more in monthly income. Don't know anything about HTML or website publishing, not a problem. I will show you everything you need to succeed in this business. Online training courses and coaching Do people always ask you for advice on how to do something? Are you the go to person at your company, or in a group? Do you enjoy helping people learn new tasks? If so, creating online courses and training materials might be the perfect opportunity for you. Blogging Blogging is a great way to share your passions with the world, while being able to make a little money, too. I'm not going to lie to you. Most people don't make a whole lot of money blogging. Often times they make enough to cover their expenses, and a few bucks to take the family out to dinner now and then. Other bloggers have broken loose and made six and seven figure incomes blogging. It can happen. I'm just saying don't bet all your cards on it. Running a successful blog takes a lot of work; a lot of writing; and persistence in employing traffic building tactics.

Finally, I share some useful tips that can be used to scale up and expand your affiliate marketing business. Once you start making money with your efforts, you would obviously want to increase how much you make. Maybe aim for \$10,000 per month at first, but once you reach this goal - the sky is the limit. Thus, in my final chapter, I provide a comprehensive overview of what you can do to scale up your business and turn that \$10,000 per month into much more - \$20,000, \$30,000 or even more than \$50,000 in just a single month.
