## **MINERAL NUTRITION OF TROPICAL PLANTS**

---

Springer Nature This textbook aims to describe the role of minerals in plant life cycle; how these nutrients are absorbed, distributed, stored; what functions each mineral plays and the disorders that their excess or absence may cause. From an agronomic perspective, such knowledge is key to boost crop production and improve its quality, and it also helps understand how to better manage fertilizers and prevent environmental issues. The book has focus on tropical agriculture and its specific demands, providing examples of major crops (such as sugarcane, soybeans, coffee etc), silviculture and pasture species.

---

Cambridge University Press This book compares John Searle and Michel Foucault's radically opposed views on truth in order to demonstrate the need for invigorating cross-fertilization between the analytic and Continental philosophical traditions. By pressing beyond familiar clichés about analytic philosophy and postmodernism, a surprising convergence of Searle and Foucault's thought on truth emerge. Prado rebuts the analytic impression of Michel Foucault as a radical relativist and shows that Foucault not only is a realist, but also is much closer than many imagine to John Searle and Donald Davidson, both model analytic thinkers

## **ADVANCES IN FINANCIAL MACHINE LEARNING**

---

John Wiley & Sons Machine learning (ML) is changing virtually every aspect of our lives. Today ML algorithms accomplish tasks that until recently only expert humans could perform. As it relates to finance, this is the most exciting time to adopt a disruptive technology that will transform how everyone invests for generations. Readers will learn how to structure Big data in a way that is amenable to ML algorithms; how to conduct research with ML algorithms on that data; how to use supercomputing methods; how to backtest your discoveries while avoiding false positives. The book addresses real-life problems faced by practitioners on a daily basis, and explains scientifically sound solutions using math, supported by code and examples. Readers become active users who can test the proposed solutions in their particular setting. Written by a recognized expert and portfolio manager, this book will equip investment professionals with the groundbreaking tools needed to succeed in modern finance.

## **INSTITUTIONAL DETERMINANTS OF DEVELOPMENT**

---

Edward Elgar Publishing 'Law and development is a difficult field. It is at once multi-disciplinary and comparative; historical and policy driven; theoretical and empirical; positive and normative. Here at long last is a book that provides a masterful overview and critical analysis that will make this field accessible to students and teachers alike.' Katharina Pistor, Columbia Law School, US This important book focuses on the idea that institutions matter for development, asking what lessons we have learned from past reform efforts, and what role lawyers can play in this field. What Makes Poor Countries Poor? provides a critical overview of different conceptions and theories of development, situating institutional theories within the larger academic debate on development. The book also discusses why, whether, and how institutions matter in different fields of development. In the domestic sphere, the authors answer these questions by analyzing institutional reforms in the public (rule of law, political regimes and bureaucracy) and the private sectors (contracts, property rights, and privatization). In the international sphere, they discuss the importance of institutions for trade, foreign direct investment, and foreign aid. This book will be essential reading for those interested in a

concise introduction to the academic debates in this field, as well as for students, practitioners, and policymakers in law and development.

## **MACHINE LEARNING FOR ASSET MANAGERS**

---

Cambridge University Press Successful investment strategies are specific implementations of general theories. An investment strategy that lacks a theoretical justification is likely to be false. Hence, an asset manager should concentrate her efforts on developing a theory rather than on backtesting potential trading rules. The purpose of this Element is to introduce machine learning (ML) tools that can help asset managers discover economic and financial theories. ML is not a black box, and it does not necessarily overfit. ML tools complement rather than replace the classical statistical methods. Some of ML's strengths include (1) a focus on out-of-sample predictability over variance adjudication; (2) the use of computational methods to avoid relying on (potentially unrealistic) assumptions; (3) the ability to "learn" complex specifications, including nonlinear, hierarchical, and noncontinuous interaction effects in a high-dimensional space; and (4) the ability to disentangle the variable search from the specification search, robust to multicollinearity and other substitution effects.

## **NIGHT TRAIN TO LISBON**

---

Atlantic Books Ltd A huge international bestseller, with over 2 million copies sold worldwide, Night Train to Lisbon is an utterly compelling novel about one man's escape from a humdrum life in search of passion and spontaneity. Night Train to Lisbon tells the story of mild-mannered, middle-aged Classics scholar Raimund Gregorius. When, one afternoon, he walks out of his class while in the middle of giving a lesson, his uncharacteristic impulsiveness surprises him as much as his students. This break from his usually predictable routine is driven by two chance encounters that morning on his way to work - the first with a mysterious Portuguese woman, and the second with a book discovered in a forgotten corner of an old bookshop, the journal of an enigmatic Portuguese aristocrat. With the book as his talisman, Mundus finds himself boarding the night train to Lisbon on a journey to find out more about its author, Amadeu del Prado - who was this man whose words both haunt and compel him, seeming somehow clairvoyant? His investigations lead him all over the city, and bring him into contact with those who were entangled in Prado's life. Gradually, he makes unexpected friends and the picture of an extraordinary man emerges: a difficult, brilliant, charismatic man, a doctor and a poet, and a rebel against Salazar's dictatorship. And as Prado's story comes to light so, too, Gregorius himself begins his life anew. Hurling through the dark, Night Train to Lisbon is a rich tale, wonderful told, propelled both by the mystery at its heart and its evocative subject.

## **RADIATION SOURCE USE AND REPLACEMENT**

---

### **ABBREVIATED VERSION**

---

National Academies Press In the United States there are several thousand devices containing high-activity radiation sources licensed for use in areas ranging from medical uses such as cancer therapy to safety uses such as testing of structures and industrial equipment. Those radiation sources are licensed by the U.S. Nuclear Regulatory Commission and state agencies. Concerns have been raised about the safety and security of the radiation sources, particularly amid fears that they could be used to create dirty bombs, or radiological dispersal device (RDD). In response to a request from Congress, the U.S. Nuclear Regulatory Commission asked the National Research Council to conduct a study to review the uses of high-risk radiation sources and the feasibility of replacing them with lower risk alternatives. The study concludes that the U.S. government should consider factors such as potential economic consequences of misuse of the radiation sources into its assessments of risk. Although the committee found that replacements of most sources are possible, it is not economically feasible in some cases. The committee recommends that the U.S. government take steps to in the near term to replace radioactive cesium chloride radiation sources, a potential "dirty bomb" ingredient used in some medical and research equipment, with lower-risk alternatives. The committee further recommends that longer term efforts be undertaken to replace other sources. The book presents a number of options for making those replacements.

## **SAFETY ASSESSMENT METHODOLOGIES FOR NEAR SURFACE DISPOSAL FACILITIES: REVIEW AND ENHANCEMENT OF SAFETY ASSESSMENT APPROACHES AND TOOLS**

---

The ISAM project involved the review and enhancement of post-closure safety assessment methodologies and tools for both existing and proposed near surface radioactive waste disposal facilities. The main objectives of the project were to: (a) provide a critical evaluation of the approaches and tools used in the post-closure safety assessment of proposed and existing near surface radioactive waste disposal facilities; (b) enhance the approaches and tools used; (c) build confidence in the approaches and tools used. In order to help achieve these objectives, the ISAM project paid particular attention to discussing, agreeing and setting down a safety assessment methodology. The ISAM project primarily

focused on developing a consensus on the methodological aspects of safety assessment, but also gave considerable attention to illustrating the application of the methodology to three main types of disposal facilities (vault, RADON and borehole type disposal facilities).--Publisher description.

### **ARTIFICIAL INTELLIGENCE IN ASSET MANAGEMENT**

---

CFA Institute Research Foundation Artificial intelligence (AI) has grown in presence in asset management and has revolutionized the sector in many ways. It has improved portfolio management, trading, and risk management practices by increasing efficiency, accuracy, and compliance. In particular, AI techniques help construct portfolios based on more accurate risk and return forecasts and more complex constraints. Trading algorithms use AI to devise novel trading signals and execute trades with lower transaction costs. AI also improves risk modeling and forecasting by generating insights from new data sources. Finally, robo-advisors owe a large part of their success to AI techniques. Yet the use of AI can also create new risks and challenges, such as those resulting from model opacity, complexity, and reliance on data integrity.

### **BLACK OPS**

---

---

#### **THE LIFE OF A CIA SHADOW WARRIOR**

---

St. Martin's Press The Explosive National Bestseller A memoir by the highest-ranking covert warrior to lift the veil of secrecy and offer a glimpse into the shadow wars that America has fought since the Vietnam Era. Enrique Prado found himself in his first firefight at age seven. The son of a middle-class Cuban family caught in the midst of the Castro Revolution, his family fled their war-torn home for the hope of a better life in America. Fifty years later, the Cuban refugee retired from the Central Intelligence Agency as the CIA equivalent of a two-star general. *Black Ops* is the story of Ric's legendary career that spanned two eras, the Cold War and the Age of Terrorism. Operating in the shadows, Ric and his fellow CIA officers fought a little-seen and virtually unknown war to keep USA safe from those who would do it harm. After duty stations in Central, South America, and the Philippines, *Black Ops* follows Ric into the highest echelons of the CIA's headquarters at Langley, Virginia. In late 1995, he became Deputy Chief of Station and co-founding member of the Bin Laden Task Force. Three years later, after serving as head of Korean Operations, Ric took on one of the most dangerous missions of his career: to re-establish a once-abandoned CIA station inside a hostile nation long since considered a front line of the fight against Islamic terrorism. He and his team carried out covert operations and developed assets that proved pivotal in the coming War on Terror. A harrowing memoir of life in the shadowy world of assassins, terrorists, spies and revolutionaries, *Black Ops* is a testament to the courage, creativity and dedication of the Agency's Special Activities Group and its elite shadow warriors.

### **THE BOOK OF ALTERNATIVE DATA**

---

---

#### **A GUIDE FOR INVESTORS, TRADERS AND RISK MANAGERS**

---

John Wiley & Sons The first and only book to systematically address methodologies and processes of leveraging non-traditional information sources in the context of investing and risk management Harnessing non-traditional data sources to generate alpha, analyze markets, and forecast risk is a subject of intense interest for financial professionals. A growing number of regularly-held conferences on alternative data are being established, complemented by an upsurge in new papers on the subject. Alternative data is starting to be steadily incorporated by conventional institutional investors and risk managers throughout the financial world. Methodologies to analyze and extract value from alternative data, guidance on how to source data and integrate data flows within existing systems is currently not treated in literature. Filling this significant gap in knowledge, *The Book of Alternative Data* is the first and only book to offer a coherent, systematic treatment of the subject. This groundbreaking volume provides readers with a roadmap for navigating the complexities of an array of alternative data sources, and delivers the appropriate techniques to analyze them. The authors—leading experts in financial modeling, machine learning, and quantitative research and analytics—employ a step-by-step approach to guide readers through the dense jungle of generated data. A first-of-its kind treatment of alternative data types, sources, and methodologies, this innovative book: Provides an integrated modeling approach to extract value from multiple types of datasets Treats the processes needed to make alternative data signals operational Helps investors and risk managers rethink how they engage with alternative datasets Features practical use case studies in many different financial markets and real-world techniques Describes how to avoid potential pitfalls and missteps in starting the alternative data journey Explains how to integrate information from different datasets to maximize informational value *The Book of Alternative Data* is an indispensable resource for anyone wishing to analyze or monetize different non-traditional datasets, including Chief Investment Officers, Chief Risk Officers, risk professionals, investment professionals, traders, economists, and machine learning developers and users.

## **TIME SERIES**

---

### **MODELING, COMPUTATION, AND INFERENCE**

---

CRC Press Focusing on Bayesian approaches and computations using simulation-based methods for inference, Time Series: Modeling, Computation, and Inference integrates mainstream approaches for time series modeling with significant recent developments in methodology and applications of time series analysis. It encompasses a graduate-level account of Bayesian time series modeling and analysis, a broad range of references to state-of-the-art approaches to univariate and multivariate time series analysis, and emerging topics at research frontiers. The book presents overviews of several classes of models and related methodology for inference, statistical computation for model fitting and assessment, and forecasting. The authors also explore the connections between time- and frequency-domain approaches and develop various models and analyses using Bayesian tools, such as Markov chain Monte Carlo (MCMC) and sequential Monte Carlo (SMC) methods. They illustrate the models and methods with examples and case studies from a variety of fields, including signal processing, biomedicine, and finance. Data sets, R and MATLAB® code, and other material are available on the authors' websites. Along with core models and methods, this text offers sophisticated tools for analyzing challenging time series problems. It also demonstrates the growth of time series analysis into new application areas.

## **THE BEST OF ALL POSSIBLE ISLANDS**

---

### **SEVILLE'S UNIVERSAL EXPOSITION, THE NEW SPAIN, AND THE NEW EUROPE**

---

State University of New York Press Uses the world's fair of 1992 to spotlight changes in the political cultures of Spain and Europe. The 1992 world's fair in Seville serves as a vantage point from which to examine Spain's developing democracy and Europe's emerging unification, according to Richard Maddox in The Best of All Possible Islands. Visited by over fourteen million people, the Seville Expo drew the participation of more than one hundred countries and dozens of corporations. As part of Spain's "miraculous year" in which Barcelona hosted the summer Olympics and Madrid was designated the Cultural Capital of Europe, the Expo advanced a remarkably optimistic, cosmopolitan, and liberal vision of the past, present, and future of the "new Spain" and the "new Europe." Yet no aspect of this vision went unchallenged, and the Expo was at the center of fierce political rivalries and dramatic manifestations of popular discontent. In an engaging and accessible narrative, Richard Maddox demonstrates how visitors and local residents understood the significance of the event in ways that largely escaped the knowledge and control of the Expo's organizers. Understanding how and why this occurred casts critical light on the transformation of Spain since the end of the Franco dictatorship in 1976 and illuminates some of the key cultural and political dilemmas that processes of European and global integration pose for citizens of democratic societies. Richard Maddox is Associate Professor of Anthropology and History at Carnegie Mellon University and the author of El Castillo: The Politics of Tradition in an Andalusian Town.

---

Oxford University Press, USA This edition has been significantly enhanced by the inclusion of more high-quality images to help illustrate scientific concepts and clinical scenarios. In the previous edition we reinforced the link between prevention, operative dentistry, and overall patient care. This minimum intervention care philosophy continues to underpin the current edition, with increasing emphasis placed upon the differing important roles of the oral healthcare team. The operative skill set of a new dental graduate has evolved to encompass not only the techniques, materials, and science of minimally invasive dentistry, but also, increasingly, the behaviour management of their patients. Without patients taking responsibility for their oral health, even the best operative dentistry will fail, regardless of the materials used.
