Sacred Cow

The Case for (Better) Meat: Why Well-Raised Meat Is Good for You and Good for the Planet

BenBella Books We're told that if we care about our health—or our planet—eliminating red meat from our diets is crucial. That beef is bad for us and cattle farming is horrible for the environment. But science says otherwise. Beef is framed as the most environmentally destructive and least healthy of meats. We're often told that the only solution is to reduce or quit red meat entirely. But despite what anti-meat groups, vegan celebrities, and some health experts say, plant-based agriculture is far from a perfect solution. In *Sacred Cow*, registered dietitian Diana Rodgers and former research biochemist and New York Times bestselling author Robb Wolf explore the quandaries we face in raising and eating animals—focusing on the largest (and most maligned) of farmed animals, the cow. Taking a critical look at the assumptions and misinformation about meat, *Sacred Cow* points out the flaws in our current food system and in the proposed "solutions." Inside, Rodgers and Wolf reveal contrarian but science-based findings, such as:

- Meat and animal fat are essential for our bodies.
- A sustainable food system cannot exist without animals.
- A vegan diet may destroy more life than sustainable cattle farming.
- Regenerative cattle ranching is one of our best tools at mitigating climate change.

You'll also find practical guidance on how to support sustainable farms and a 30-day challenge to help you transition to a healthful and conscientious diet. With scientific rigor, deep compassion, and wit, Rodgers and Wolf argue unequivocally that meat (done right) should have a place on the table. It's not the cow, it's the how!

Your Personal Paleo Diet

Feel and look great by eating the foods that are ideal for your body

Hachette UK The idea behind the Paleo, or 'caveman', diet is simple - eat the food we humans were genetically and biologically meant to eat, as our hunter-gatherer ancestors once did, and we can all experience near-effortless weight loss, increased vitality and greatly improved health. But does it really make sense to restrict yourself to the limited range of foods available to our ancestors? Although we share a lot in common with them, we each have our own genes, tastes and health goals. In this groundbreaking book, leading expert Chris Kresser offers his unique solution - a 3-step

plan that will fit your body, your lifestyle and your specific health issues. Start by following the basic Paleo plan for 30 days and enjoy a satisfying diet of lean meat, fish, non-starchy vegetables, some fruit, nuts and seeds but avoid grains, dairy, sugar and refined foods. After this 30-day plan, Chris helps you re-introduce certain foods in moderation to find out what agrees with you and what doesn't. So what are you waiting for? You can enjoy life more, look slimmer and feel more vital. And because Chris advocates an 80/20 approach - we all have to live in the real world after all - you can still enjoy your favourite treats from time to time. In addition to dietary advice, the plan also includes guidance on fine-tuning your sleep, exercise and response to stress - all crucial elements in living a life that suits our natural design.

Eat the Yolks

Victory Belt Publishing **Worry about cholesterol. Avoid red meat. Eat whole grains. Could it all be a lie? We live in an era of health hype and nutrition propaganda, and we're suffering for it. Decades of avoiding egg yolks, choosing margarine over butter, and replacing the real foods of our ancestors with low-fat, processed, packaged substitutes have left us with an obesity epidemic, ever-rising rates of chronic disease, and, above all, total confusion about what to eat and why. This is a tragedy of misinformation, food industry shenanigans, and cheap calories disguised as health food. It turns out that everything we've been told about how to eat is wrong. Fat and cholesterol are harmful to your health? Nope—they are crucial to your health. "Whole grains" are health food? Not even close. Counting calories is the way to lose weight? Not gonna work—nutrients are what matter. Nutrition can come from a box, bag, or capsule? Don't count on it! In *Eat the Yolks*, Liz Wolfe debunks all these myths and more, revealing what's behind the lies and bringing the truth about fat, cholesterol, protein, and carbs to light. You'll be amazed at the tall tales we've been told in the name of "healthy eating." With wit and grace, Wolfe makes a compelling argument for a diet based on Paleo foods. She takes us back to the foods of our ancestors, combining the lessons of history with those of modern science to uncover why real, whole food—the kind humans ate for thousands of years before modern nutrition dogma led us astray—holds the key to amazing health and happy taste buds. In *Eat the Yolks*, Liz Wolfe doesn't just make a case for eating the whole egg. She uncovers the shocking lies we've been told about fat, cholesterol, protein, carbs, and calories and brings us the truth about which foods are healthy—and which foods are really harming us. You'll learn truths like: - fat and cholesterol are crucial, not harmful . . . and why - "whole grains" are processed foods . . . and what to eat instead - counting calories is a waste of energy . . . and what we actually should be tracking - all animal products are not created equal . . . and which ones we truly need - nutrition doesn't come in a box, bag, or capsule . . . and why there's no substitute for real food!**

The Paleo Miracle

50 Real Stories of Health Transformation

The Paleo Miracle **The Paleo Miracle: 50 Real Stories of Health Transformation** Do you think that weight gain and disease are simply a function of age and genetics? Do you wonder why, despite eating a whole-grain, low-fat diet and putting in countless hours of exercise, you aren't getting any thinner? Most importantly: Why do you eat the way you do? Because someone else told you that it is healthy? In the paleo community, we believe that **FOOD IS MEDICINE**. We have either eliminated all symptoms of, or dramatically improved, the diseases we had - diseases like diabetes, heart disease, ADHD, Crohn's, and many others - by eating **REAL** food, and in most cases have become completely medication-free. Lights Out

Sleep, Sugar, and Survival

Simon and Schuster **When it comes to obesity, diabetes, heart disease, cancer, and depression, everything you believe is a lie. With research gleaned from the National Institutes of Health, T.S. Wiley and Bent Formby deliver staggering findings: Americans really are sick from being tired. Diabetes, heart disease, cancer, and depression are rising in our population. We're literally dying for a good night's sleep. Our lifestyle wasn't always this way. It began with the invention of the lightbulb. When we don't get enough sleep in sync with seasonal light exposure, we fundamentally alter a balance of nature that has been programmed into our physiology since day one. This delicate biological rhythm rules the hormones and neurotransmitters that determine appetite, fertility, and mental and physical health. When we rely on artificial light to extend our day until 11 p.m., midnight, and beyond, we fool our bodies into living in a perpetual state of summer. Anticipating the scarce food supply and forced inactivity of winter, our bodies begin storing fat and slowing metabolism to sustain us through the months of hibernation and hunger that never arrive. Our own survival instinct, honed over millennia, is now killing us. Wiley and Formby also reveal: -That studies from our own government research prove the role of sleeplessness in diabetes, heart disease, cancer, infertility, mental illness, and premature aging -Why the carbohydrate-rich diets recommended by many health professionals are not only ridiculously ineffective but deadly -Why the lifesaving information that can turn things around is one of the best-kept secrets of our day. Lights Out is one wake-up call none of us can afford to miss.**

Ancient Wisdom for Lifelong Health

Harmony In **The Paleo Manifesto: Ancient Wisdom for Lifelong Health**, John Durant argues for an evolutionary - and revolutionary - approach to health. All animals, human or otherwise, thrive when they mimic key elements of life in their natural habitat. From diet to movement to sleep, this evolutionary perspective sheds light on some of our most pressing health concerns. What is causing the rise of chronic conditions, such as obesity, diabetes, and depression? Is eating red meat going to kill you? Is avoiding the sun actually the best way to avoid skin cancer? Durant takes readers on a thrilling ride to the Paleolithic and beyond, unlocking the health secrets of our ancient ancestors. What do obese gorillas teach us about weight loss? How can Paleolithic skulls contain beautiful sets of teeth? Why is the Bible so obsessed with hygiene? What do NASA astronauts teach us about getting a good night's sleep? And how are Silicon Valley techies hacking the human body? Blending science and culture, anthropology and philosophy, John Durant distills the lessons from his adventures and shows how to apply them to day-to-day life, teaching people how to construct their own personal "habitat" that will enable them to thrive. The book doesn't just address what we eat, but why we eat it; not just how to exercise, but the purpose of functional movement; not just being healthy, but leading a purposeful life. Combining the best of ancient wisdom with cutting edge science, Durant crafts a vision of health that is both fresh and futuristic.
