KEY=SAMSUNG - ORTIZ WARD

PERSUASION AND RHETORIC

Yale University Press Emerson and Thoreau are the most celebrated odd couple of nineteenth-century American literature. Appearing to play the roles of benign mentor and eager disciple, they can also be seen as bitter rivals: America's foremost literary statesman, protective of his reputation, and an ambitious and sometimes refractory protege. The truth, Joel Porte maintains, is that Emerson and Thoreau were complementary literary geniuses, mutually inspiring and inspired. In this book of essays, Porte focuses on Emerson and Thoreau as writers. He traces their individual achievements and their points of intersection, arguing that both men, starting from a shared belief in the importance of self-culture, produced a body of writing that helped move a decidedly provincial New England readership into the broader arena of international culture. It is a book that will appeal to all readers interested in the writings of Emerson and Thoreau.

Oxford University Press Risk is everywhere - from genetically modified crops, dams, and stem-cell therapy to heartbreak, online predators, inflation, and robbery. RISK THEORY AND REINSURANCE

Springer Science & Business Media Reinsurance is an important production factor of non-life insurance. The efficiency and the capacity of the reinsurance market directly regulate those of insurance markets. The purpose of this book is to provide a concise introduction to risk theory, as well as to its main application procedures to reinsurance. The first part of the book covers risk theory. It presents the most prevalent model of ruin theory, as well as a discussion on insurance premium calculation principles and the mathematical tools that enable portfolios to be ordered according to their risk levels. The second part describes the institutional context of reinsurance. It first strives to clarify the legal nature of reinsurance transactions. It describes the structure of the reinsurance market and then the different legal and technical features of reinsurance contracts, known as reinsurance 'treaties' by practitioners. The third part creates a link between the theories presented in the first part and the practice described in the second one. Indeed, it sets out, mostly through examples, some methods for pricing and optimizing reinsurance. The authors aim is to apply the formalism presented in the first part to the institutional framework given in the second part. It is reassuring to find such a relationship between approaches seemingly abstract and solutions adopted by practitioners. Risk Theory and Reinsurance is mainly aimed at master's students in actuarial science but will also be useful for practitioners wishing to revive their knowledge of risk theory or to quickly learn about the main mechanisms of reinsurance.

CONTEMPORARY VOICES IN PROSE AND POETRY

RISK ANALYSIS IN THEORY AND PRACTICE

Elsevier The objective of Risk Analysis in Theory and Practice is to present this analytical framework and to illustrate how it can be used in the investigation of economic decisions under risk. In a sense, the economics of risk is a difficult subject: it involves understanding human decisions in the absence of perfect information. How do we make decisions when we do not know some of events affecting us? The complexities of our uncertain world and of how humans obtain and process information make this difficult. In spite of these difficulties, much progress has been made. First, probability theory is the corner stone of risk assessment. This allows us to measure risk in a fashion that can be communicated among decision makers or researchers. Second, risk preferences are now better understood. This provides useful insights into the economic rationality of decision making under uncertainty. Third, over the last decades, good insights have been developed about the value of information. This helps better understand the role of information in human decision making and this book provides a systematic treatment of these issues in the context of both private and public decisions under uncertainty. Balanced treatment of conceptual models and applied analysis Considers both private and public decisions under uncertainty Website presents application exercises in Excel

RISK AND ACCEPTABILITY

Routledge First published in 1985, Mary Douglas intended Risk and Acceptability as a review of the existing literature on the state of risk theory. Unsatisfied with the current studies of risk, which she found to be flawed by individualistic and psychologistic biases, she instead uses the book to argue risk analysis from an anthropological perspective. Douglas raises questions about rational choice, the provision of public good and the autonomy of the individual.

ROBERT BROWNING: SELECTED POEMS

Routledge Robert Browning (1812 - 1889) was one of the defining figures of the Victorian age. Famous in his lifetime for his elopement and marriage to Elizabeth Barratt, his critical reputation grew steadily in the years following her early death. Browning's mastery of dramatic verse was evident throughout his career, from such chillingly unforgettable monologues as 'My Last Duchess' and 'Porphyria' to the mature work included in his collection Dramatis Personae. This selection, chosen by leading scholars, reveals the innovation, complexity and profound psychological insight that have ensured Browning's enduring reputation and his continuing appeal to readers today. Browning: Selected Poems results from a completely fresh appraisal of the canon, text and context of the writer's work. The poems are presented in the order of their composition and in the text in which they were first published, giving a unique insight into the development of Browning's art. An introduction and chronology offer useful background material, whilst annotations and headnotes provide details of composition, publication, sources and contemporary reception. This authoritative yet accessible selection should become the first point of reference for scholar, student and general reader alike.

ROBERT DUNCAN, THE AMBASSADOR FROM VENUS

A BIOGRAPHY

Univ of California Press "This is a book of wonders, beautifully written and brilliantly researched. Lisa Jarnot offers a work of devotion to the truth and spirit of Robert Duncan's life and art, the result of twenty years of study and reflection. A great story as well as a rigorous exploration of the poet's art of the imagination, it will pull readers back into Duncan's poetry at the same time that it recounts his rich, adventurous, and always creative life."--Robert Adamson, author of The Goldfinches of Baghdad. "Lisa Jarnot's biography of Robert Duncan represents an essential contribution to our understanding of this complex, inspired man, his life and art, and the many circles in which he moved through the years. It is one of those rare works that melds scholarly diligence with poetic comprehension."--Michael Palmer, author of Thread. "Robert Duncan was a poet of enormous means and complexity, one of the last to pursue a truly cosmological poetics. In that pursuit he was a poet (even a great poet), who

created - like Whitman before him - his own life with all its openings & pitfalls as beyond all else a life-of-poetry. Lisa Jarnot's biography now gives us a first, richly detailed depiction of that life, a powerful and necessary complement to Duncan's poetry itself. A product of the century behind us, it offers up a lasting legacy for the century to come."--Jerome Rothenberg, author of *Technicians of the Sacred*.

RISING ROAD

A TRUE TALE OF LOVE, RACE, AND RELIGION IN AMERICA

Oxford University Press It was among the most notorious criminal cases of its day. On August 11, 1921, in Birmingham, Alabama, a Methodist minister named Edwin Stephenson shot and killed a Catholic priest, James Coyle, in broad daylight and in front of numerous witnesses. The killer's motive? The priest had married Stephenson's eighteen-year-old daughter Ruth to Pedro Gussman, a Puerto Rican migrant and practicing Catholic. Sharon Davies's *Rising Road* resurrects the murder of Father Coyle and the trial of his killer. As Davies reveals with novelistic richness, Stephenson's crime laid bare the most potent bigotries of the age: a hatred not only of blacks, but of Catholics and "foreigners" as well. In one of the case's most unexpected turns, the minister hired future U.S. Supreme Court Justice Hugo Black to lead his defense. Though regarded later in life as a civil rights champion, in 1921 Black was just months away from donning the robes of the Ku Klux Klan, the secret order that financed Stephenson's defense. Entering a plea of temporary insanity, Black defended the minister on claims that the Catholics had robbed Ruth away from her true Protestant faith, and that her Puerto Rican husband was actually black. Placing the story in social and historical context, Davies brings this heinous crime and its aftermath back to life, in a brilliant and engrossing examination of the wages of prejudice and a trial that shook the nation at the height of Jim Crow. "Davies takes us deep into the dark heart of the Jim Crow South, where she uncovers a searing story of love, faith, bigotry and violence. *Rising Road* is a history so powerful, so compelling it stays with you long after you've finished its final page." --Kevin Boyle, author of the National Book Award-winning *Arc of Justice* "This gripping history...has all the makings of a Hollywood movie. Drama aside, *Rising Road* also happens to be a fine work of history." --History News Network

This is the story of that ranch, soon after the turn of the twentieth century, and of David Love, the geologist who grew up there, at home with the composition of the high country in the way that someone growing up in a coastal harbor would be at home with the vagaries of the sea.

EXECUTIVE LESSONS IN CHARACTER, COURAGE, AND VISION

Currency Robert E. Lee was a leader for the ages. He was a brilliant strategist and a man of unyielding courage who, in the face of insurmountable odds, nearly changed forever the course of history. Each chapter concludes with the extraordinary lessons learned, which can be applied not only to your professional life, but also to your private life as well. Today's business world requires leaders of uncommon excellence who can overcome the cold brutality of constant change. Robert E. Lee was such a leader. He triumphed over challenges people in business face every day. Guided by his magnificent example, so can you.

RIVETED: THE SCIENCE OF WHY JOKES MAKE US LAUGH, MOVIES MAKE US CRY, AND RELIGION MAKES US FEEL ONE WITH THE UNIVERSE

St. Martin's Press Why do some things pass under the radar of our attention, but other things capture our interest? Why do some religions catch on and others fade away? What makes a story, a movie, or a book riveting? Why do some people keep watching the news even though it makes them anxious? The past 20 years have seen a remarkable flourishing of scientific research into exactly these kinds of questions. Professor Jim Davies' fascinating and highly accessible book, *Riveted*, reveals the evolutionary underpinnings of why we find things compelling, from art to religion and from sports to superstition. Compelling things fit our minds like keys in the ignition, turning us on and keeping us running, and yet we are often unaware of what makes these "keys" fit. What we like and don't like is almost always determined by subconscious forces, and when we try to consciously predict our own preferences we're often wrong. In one study of speed dating, people were asked what kinds of partners they found attractive. When the results came back, the participants' answers before the exercise had no correlation with who they actually found attractive in person! We are beginning to understand just how much the brain makes our decisions for us: we are rewarded with a rush of pleasure when we detect patterns, as the brain thinks we've discovered something significant; the mind urges us to linger on the news channel or rubberneck an accident in case it might pick up important survival information; it even pushes us to pick up *People* magazine in order to find out about changes in the social structure. Drawing on work from philosophy, anthropology, religious studies, psychology, economics, computer science, and biology, Davies offers a comprehensive explanation to show that in spite of the differences between the many things that we find compelling, they have similar effects on our minds and brains.
