**A PRACTICAL GUIDE TO DATA VISUALIZATION, ADVANCED DATA MINING METHODS, AND APPLICATIONS**

---

**John Wiley & Sons** *A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques*  
*This second installment in the Making Sense of Data series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, Making Sense of Data II addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of*

situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series ([www.makingsenseofdata.com](http://www.makingsenseofdata.com)) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traceis™ software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, Making Sense of Data II is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could help their organization.

---

---

**World Scientific** *The volume is dedicated to Professor David Elworthy to celebrate his fundamental contribution and exceptional influence on stochastic analysis and related fields. Stochastic analysis has been profoundly developed as a vital fundamental research area in mathematics in recent decades. It has been discovered to have intrinsic connections with many other areas of mathematics such as partial differential equations, functional analysis, topology, differential geometry, dynamical systems, etc. Mathematicians developed many mathematical tools in stochastic analysis to understand and model random phenomena in physics, biology, finance, fluid, environment science, etc. This volume contains 12 comprehensive review/new articles written by world leading researchers (by invitation) and their collaborators. It covers stochastic analysis on manifolds, rough paths, Dirichlet forms, stochastic partial differential equations, stochastic dynamical systems, infinite dimensional analysis, stochastic flows, quantum stochastic analysis and stochastic Hamilton Jacobi theory. Articles contain cutting edge research methodology, results and ideas in relevant fields. They are of interest to research mathematicians and postgraduate students in stochastic analysis, probability, partial differential equations, dynamical systems, mathematical physics, as well as to physicists, financial mathematicians, engineers, etc.*

## **MICRO AND NANO FLOW SYSTEMS FOR BIOANALYSIS**

---

**Springer Science & Business Media** *Micro and Nano Flow Systems for Bioanalysis addresses the latest developments in biomedical engineering at very small scales. It shows how organic systems require multi-scale understanding in the broadest sense whether the approach is experimental or mathematical, and whether the physiological state is healthy or diseased. Micro-and nano-fluidics represent key areas of translational research in which state-of-the-art engineering processes and devices are applied to bedside monitoring and treatment. By applying conventional micro- and nano-engineering to complex organic solids, fluids, and their interactions, leading researchers from throughout the world describe methods and techniques with great potential for use in medicine and clinical practice. Coverage includes the seeming plethora of new, fine-scale optical methods for measuring blood flow as well as endothelial activation and interaction with tissue. Generic areas of modeling and bioelectronics are also considered. In keeping with the recurring theme of medicine and clinical practice, approximately half of the chapters focus on the specific application of micro- and nano- flow systems to the understanding and treatment of cancer and cardiovascular diseases. This book developed from an*

Expert Overview Session on "Micro & Nano Flows in Medicine: the way ahead" at the 3rd Micro and Nano Flows Conference (MNF2011) held in Thessaloniki, Greece. Additional chapters were included to enhance the international, state-of-the-art coverage.

## MANAGING MULTIPLE SCLEROSIS NATURALLY

---

### A SELF-HELP GUIDE TO LIVING WITH MS

---

**Simon and Schuster** *A totally revised and updated edition of the first book to offer a holistic approach to slowing the progression of MS • Provides guidance on special diets and nutritional supplements, exercise, alternative therapies, and the effects of negative and positive thoughts on MS • Explains how to reduce toxic overload from mercury and chemicals • Includes life wisdom and coping strategies from others who suffer with MS* *Judy Graham is an inspiration. Diagnosed with multiple sclerosis when she was just 26 years old, 35 years later Judy Graham is still walking, working, and has successfully birthed and raised a son who is now an adult. In this totally revised and updated edition of her groundbreaking Multiple Sclerosis, first published in 1984, she shares the natural treatments that have helped her and many others with MS stabilize or even reverse the condition. Beginning with the effects of diet, she explains that many people with MS have been eating the wrong foods and shows which foods are “good” and “bad,” how to recognize food sensitivities, and how to correct nutritional deficiencies using dietary supplements. She also looks at reducing the body’s toxic overload, whether from mercury amalgam fillings, chemicals, or medications. She presents the exercises with proven benefits for MS she has found most reliable and appropriate, such as yoga, pilates, and t’ai chi, and explores alternative therapies that provide relief and support to the body’s efforts to control MS, including acupuncture, reflexology, shiatsu, reiki, and ayurveda. Most important are the insights she provides on the effects of negative thoughts on MS. She demonstrates how a positive mental attitude can actually slow down or even reverse the progression of this disease. Judy Graham is living proof that, as devastating as a diagnosis of MS is, life can still be lived to its fullest.*

## MIGRATION AND LABOUR MARKETS IN THE SOCIAL SCIENCES

---

**LIT Verlag Münster** *The interplay of migration and labour markets is a phenomenon too diverse to be explained by a single theory. Thus, this volume, based on contributions presented during a workshop in Saarbrücken, Germany, brings together experts in migration research from economics, political science, and sociology. The rationale for choosing the topic is the existence of misconceptions and prejudices in public debate about migration. The contributions investigate the main effects of migration on labour markets for both, the home and the host country, and discuss normative, positive, and instrumental aspects of migration from different perspectives.*

**Wellness Publishers,L.L.C** *This is the first book to be published by a patient about the journey out of the black hole of depression thanks to the remarkable medical breakthrough procedure of vagus nerve stimulation. Out of the Black Hole is written by a patient for patients with easy-to-understand explanations which demystify this simple, safe procedure and helps patients make an informed decision about the surgery. Vagus Nerve Stimulation is not related to brain surgery or ECT. There are no cognitive impairments (i.e. memory loss) or drug interactions. Included is information about the potential side effects, benefits, insurance reimbursement codes and reimbursement process. Vagus nerve stimulation has been FDA approved for epilepsy since 1997 and in July of 2005 the FDA approved vagus nerve stimulation for chronic or treatment-resistant depression. Over 30,000 patients have safely been implanted with the device for epilepsy. The procedure is generally done on an out-patient basis. This is considered one of the major breakthroughs in medical device history which could potentially help the 4.5 million Americans who suffer from the debilitating illness of chronic depression.*

**ORGANISING LABOUR IN GLOBALISING ASIA**

---

**Routledge** *This book offers wide-ranging insights into the organising capacities of workers in Asia today. Nine case-studies examine workers' responses to class relations through independent unions, non-government organisations (NGOs) and more (dis)organised struggles. Countering the notion that globalisation holds entirely negative consequences for labour organisation, the authors reveal some of the openings for local activism which can arise from transnational production arrangements. The volume covers the "second-tier" industrializers - China, Thailand, Malaysia, the Philippines, Indonesia, India and Bangladesh. Interdisciplinary in nature, it will be of great interest to students and scholars of Asian studies, development studies and international labour studies.*
