## All Two-Stroke Singles, Twins and Triples (Plus Re5)-1952 to 1979

*Motorbooks International* Aside from the odd four-stroke built in their formative years, it wasn't until 1976 that Suzuki manufactured such machines in significant numbers. Until then, it was two-strokes all the way. These models, many of which were the basis of successful racers, carried names like Titan, Cobra, Sebring, LeMans, Kettle, and Water Buffalo along with their codes. The author examines these models and others, providing the reader with: -- Extensive specification tables highlighting the variations in seemingly similar models -- Information to help the reader match model and marketing codes, essential when ordering parts or servicing a machine -- A model chart that matches full codes to their exact year, shows the years in which models were built, and explains the relationship between similar codes Also included is the RE5 with its rotary engine and unique styling, and Suzuki's minute but complex road racers, which carried as many as 14 speeds in their gearboxes. Illustrated throughout with black-and-white photographs of the models and their variants.

### The Autobiography

The autobiography of motorcycle ace Aaron Slight; a best seller that takes the reader from a small town in New Zealand to the high-stakes world of international motorsport. Aaron is the world's most experienced World Superbike racer. He has competed in 229 World Superbike races; stood on the WSB podium 87 times, and won the gruelling Suzuka 8-Hour Endurance race three times in a row. He gained the respect of thousands of fans for two miraculous comebacks; first from a debilitating and deforming hand injury, then a stroke that led to complex brain surgery. Aaron became the highest paid sportsman of his native New Zealand, and nearly won the World Superbike championship six times. His journey to the top of the motorcycle-racing world is an improbable one, made possible by his sheer determination to overcome all the obstacles in his path. This is his gripping story.

### My Incredible Journey

*Hachette UK* It started on a cold, frosty morning in 1951 in Christchurch, New Zealand, with a seventeen-year-old-boy, a crate of sheep's kidneys and a dream. The boss of the city's Belfast meatworks, had arrived an hour early to set up for the day, when he noticed one of his workers packing up a crate on the countertop. The young lad was battling to move it so the boss went over to help. When asked what time he'd started, the boy replied 'Five o'clock this morning'. Stunned, and amused, the boss told him he'd be earning a good bonus at the end of the week, and wondered aloud what he'd spend it on. But the boy knew, and immediately replied, 'I'm going to race speedway in England.' And he did. That boy was Barry Briggs, and it was just the start of his great adventure. Little did he know he was soon to become the legendary speedway racer more commonly known as Briggo, and later as Barry Briggs MBE.

From dangerous encounters in the jungles of Liberia to teaching Steve McQueen to slide a speedway bike, Briggo's incredible story is one of strength, determination and a life lived firmly in the fast lane.

### Motorcycle Engineering

Veloce Enterprises, Incorporated 328 pages, 186 black & white illustrations, size 5.5 x 8.5 inches. This is a faithful reproduction of the 1962 Floyd Clymer U.S.A. Edition of the same title. While the primary focus of this publication utilizes 1960's and prior motorcycles as examples, the reader is reminded that engineering theory and the laws of physics do not change and as such, the information it contains is still relevant today. Consequently, this publication is indispensable to those either contemplating modification to a current model or the construction of a 'special' for any form of motorcycle competition. Predominantly a technical work, it is written in terms easily understood by the layman. While it includes geometry and math formulae the reader will be aptly rewarded if they take a moment to comprehend the significance of the examples. Consequently, 'Motorcycle Engineering' is considered by many knowledgeable motorcycle enthusiasts to be the best book ever written on how to construct, improve, modify and fine tune a motorcycle from the 'ground up'. It is our pleasure to offer this reprint to all motorcycle enthusiasts worldwide.
